Meade Lxd55 Series User Guide:

A User's Guide to the Meade LXD55 and LXD75 Telescopes Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55.com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope [The Urban Astronomer's Guide](#) Rod

Mollise, 2006-12-22 Most amateur astronomers yearn to observe more frequently Many of them however live in urban and highly developed suburban areas that are heavily light polluted Due to this light pollution they are under the impression that deep sky objects nebulae galaxies star clusters are either invisible or not worth viewing from home This book describes the many objects that can be seen in a bright urban sky and shows the city or suburban astronomer how to observe object after object season after season This book covers the why how and what of astronomy under light polluted skies The prospective city based observer is told why to observe from home there are hundreds of spectacular objects to be seen from the average urban site how to observe the city sky telescopes accessories and modern techniques and what to observe About 50% of the book is devoted to describing tours of the sky with physical and observational descriptions at the eyepiece drawings and photographs *A User's Guide to the Meade LXD55 and LXD75 Telescopes* Martin Peston, 2011-09-17 This book offers a

comprehensive introductory guide to choosing and using a series LXD55 or LXD75 computer controlled goto telescope containing a wealth of useful information for both beginners and more advanced practical amateur astronomers The manufacturer's manuals are not nearly detailed enough to be of real help to beginners No other book offers advanced techniques for more experienced LXD series users **Astronomy with a Home Computer** Neale Monks, 2006-03-30 Here is a one volume guide to just about everything computer related for amateur astronomers Today's amateur astronomy is inextricably linked to personal computers Computer controlled go to telescopes are inexpensive CCD and webcam imaging make intensive use of the technology for capturing and processing images Planetarium software provides information and an easy interface for telescopes The Internet offers links to other astronomers information and software The list goes on and on Find out here how to choose the best planetarium program are commercial versions really better than freeware Learn how to

optimise a go to telescope or connect it to a lap top Discover how to choose the best webcam and use it with your telescope Create a mosaic of the Moon or high resolution images of the planets Astronomy with a Home Computer is designed for every amateur astronomer who owns a home computer whether it is running Microsoft Windows Mac O S or Linux It doesn t matter what kind of telescope you own either a small refractor is just as useful as a big go to SCT for most of the projects in this book Astronomy Now ,2008 *Star Ware* Philip S. Harrington,2011-02-25 Praise for Star Ware Star Ware is still a tour de force that any experienced amateur will find invaluable and which hardware minded beginners will thoroughly enjoy Robert Burnham Sky distributors dealers and conventions and corporate listings for products and services An Amateur's Guide to Observing and Imaging the Heavens Ian Morison,2014-05-26 An Amateur s Guide to Observing and Imaging the Heavens is a highly comprehensive guidebook that bridges the gap between the beginners and hobbyists books and the many specialised and subject specific texts for more advanced amateur astronomers Written by an experienced astronomer and educator the book is a one stop reference providing extensive information and advice about observing and imaging equipment with detailed examples showing how best to use them In addition to providing in depth knowledge about every type of astronomical telescope and highlighting their strengths and weaknesses two chapters offer advice on making visual observations of the Sun Moon planets stars and galaxies All types of modern astronomical imaging are covered with step by step details given on the use of DSLRs and web cams for solar lunar and planetary imaging and the use of DSLRs and cooled CCD cameras for deep sky imaging **Choosing and Using a New CAT** Rod Mollise,2009-02-28 Choosing and Using the New CAT will supersede the author s successful Choosing and Using a Schmidt Cassegrain Telescope which has enjoyed enthusiastic support from the amateur astronomy community for the past seven years Since the first book was published a lot has changed in the technology of amateur astronomy The sophistication and variety of the telescopes available to amateurs has increased dramatically Computerized SCTs Maksutov Cassegrains and most recently Meade s new and acclaimed Ritchey Chr tiens have come to dominate the market That means that all amateurs considering the purchase of a new telescope not only a SCT and not just beginners will benefit from this detailed guide Choosing the right telescope for particular kinds of observation or even for general work is far from easy but Rod Mollise gives invaluable advice and guidance The Advertising Red Books ,2006-10 **Monthly Notes of the Astronomical Society of Southern Africa** Astronomical Society of Southern Africa,2003 *Sterne und Weltraum* ,2008
