Food Processing

The Indian food processing industry presents itself as an attractive investment destination driven by changing consumption patterns and favourable policy environment.

India's food processing industry contributes 9 percent to the country's gross domestic product. The government is targeting an investment of \$21.9 billion in the food processing industry over the next five years with increased participation from the private sector and financial institutions.

In terms of policy support, the government has formulated the National Food processing policy and approved complete de-licensing for the sector excluding alcoholic beverages. The sector was also declared a priority sector for lending in 1999. The central government is working with all the states to reform policy and facilitate investment in the food processing sector.

The areas for investment in the food processing industry include:

- Mega food parks
- Agri-infrastructure
- Supply chain aggregation
- Logistics and cold chain infrastructure
- Machinery and packaging

Why India for food processing?

- Vast source of raw material and low production cost**
India ranks first in availability of milk, pulses and tea, and second in fruits, vegetables, rice and wheat. Milk products offer a significant opportunity in India as it is the world's largest producer. In addition to this, the relatively low-cost but skilled workforce could be utilized to set up production facilities.
- Large consumer market and changing consumption patterns**
India's homogeneous market size endowed with growing incomes and changing lifestyles has created market opportunities for food producers, machinery makers, food technology and service providers. Also, proportionate expenditure on staples such as cereals, grains and pulses has declined while the expenditure on milk and milk products, egg, fish, fruits and beverages increased.
- Food parks and special agriculture zones**
The government is promoting agriculture zones and mega food parks to develop the food processing sector. More than 30 food parks are proposed across the country to attract foreign direct investment in this sector.
- Government assistance and favourable policy environment**
The national policy on food processing aims at increasing the level of food processing from the present 2 per cent to 10 per cent by 2010

Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies,2008 **Faithful Education** Amy Lynn Dee,Gary Tiffin,2012-08-24 This book presents nine biblical themes in essays authored by veteran educators who surprise and affirm readers with personal

accounts of how these themes shaped their practice in education Culture faith and praxis often inform one another and in an era of increased scrutiny and criticism of education educators hold tremendous power in shaping the education of students by incorporating these values into daily practice A cycle of improvement follows purposeful attention to biblical principles and provides educators with the means to reclaim and reshape our profession When teachers are willing to examine their practice in light of biblical themes and values learning becomes meaningful and lasting Often that learning goes beyond the formal educational process Educators serve as role models and the experiences we provide for our students shape who they become and how they view life A faithful educator encourages positive dispositions of the heart mind and spirit The charge and responsibility of developing the hearts minds and spirits of those who enter our classrooms and the magnitude of the call to teach these students requires faithful recognition of these biblical themes Retailing Denise T.
