1. Where does the needle on a compass normally point?

The needle points north

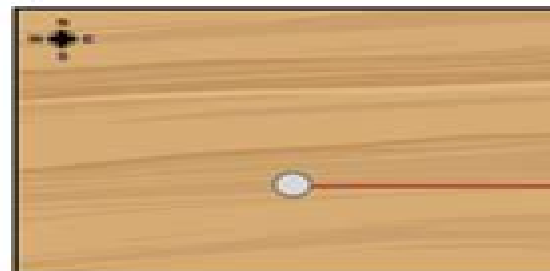

2. What will happen to the compass needle if you hold a magnet close to it?

the needle point towards the magnet

Gizmo Warm-up

A compass is a useful tool for measuring the direction of a *magnetic induction field*—more commonly called a **magnetic field**—because the needle's northern tip points in the direction of a field. In the *Magnetic Induction* Gizmo, you will use compasses to measure the magnetic field caused by a **current**.

The left side of the Gizmo shows an overhead and front view of a table with a wire threaded vertically through its center, perpendicular to the surface of the table. Check that the **Current** is set to 0 amps.

1. Drag a compass to several different locations on the table. Where does the compass needle point?

The compass needle always points North

The effect you see is due to Earth's magnetic field.
