and satellites influences visual culture beyond the screen The smooth flight from aerial overview to intimate close up in Martin Scorsese s Hugo 2011 exemplifies the concept of proxistant vision a combination of proximity and distance close up and overview detail and the big picture in a unified visual form In Proxistant Vision Synne Bull and Dragan Miletic develop the concept of proxistant vision and trace its emergence as a visual paradigm of the twenty first century As exemplified by Google Earth s digital swipe between globe perspective and street level detail proxistant vision currently proliferates across digital geography computer games architectural models data visualizations and CGI cinema It is defined as the combination of proximity and distance in a single image across a dynamic flight or zoom Pointing to the surge in aerial imaging and remote sensing technologies such as drones and satellites the book moves beyond the screen to include the kinetic architecture of rides and urban observation wheels The key objective of this study is threefold to trace the genealogy and understand the technical operation of proxistance as it traveled from periphery to center in the twenty first century to explore its alternative potentialities in contemporary art practices and finally to reflect critically on the worldviews underpinning different modalities of proxistance in times of environmental crisis The authors show how the powerful effect of combining proximity and distance which was already in place with the earliest cartographic inscriptions has taken precedence on and beyond our screens today
