*Mathematics Teaching and Professional Learning in sub-Sahara Africa* Kakoma Luneta, 2021-12-09 The book represents a crop of wide ranging research conducted by renowned scholars in sub-Saharan Africa revolving around mathematics teaching and professional development programs for mathematics teachers. The research-based proposals and actual how to conduct professional development initiatives that enhance effective mathematics instruction are rooted in teacher input and informed by learners' errors and misconceptions. The book provides a comprehensive snapshot on mathematics teaching, learning and effective professional development programmes for mathematics teachers in sub-Saharan Africa. It is the only research output that advances and disseminates issues of mathematics education and research in the region with input from South Africa, Kenya, Rwanda, Uganda, Malawi, Namibia, Lesotho, Ethiopia and Zimbabwe.

*The Emperor's New Computer*, 2019-02-11 c ICT's subtle and seductive impact on educational administration, globalisation, curriculum design, development and delivery and teacher roles and responsibilities has challenged the privileged notion of how education in society is or should be delivered. Most schools and curricula require ICT-enabled or supported courses as part of their mission or design. Yet the seeming ubiquitous adoption of ICT has not made the technology's use any less controversial. There is much that is still puzzling and troubling about Information and Communication Technology and its impact on teachers and learners. The Emperor's New Computer: ICT Teaching and Learning presents nine chapters that reflect international points of view on the intersection of Information and Communication Technology and education, pose critical questions about ICT's use and examine ways of navigating the complex paths that ICT has carved in all aspects of global education, society and culture.

**Early mathematics counts** Yasmin A. Sitabkhan, Linda Platas, 2018-07-23 This occasional paper examines common instructional strategies in early grade mathematics interventions through a review of studies in classrooms in low and middle income countries. Twenty-four studies met the criteria for inclusion and analyses reveal four sets of instructional strategies for which there is evidence from multiple contexts. Of the 24 studies, 16 involved the use of multiple representations, 10 involved the use of developmental progressions, 6 included supporting student use of explanation and justification, and 5 included integration of informal mathematics. Based on the review, we provide conclusions and recommendations for future research and policy.
