The Complacent Class Tyler Cowen, 2017-02-28 A Wall Street Journal and Washington Post Bestseller Tyler Cowen's blog Marginal Revolution is the first thing I read every morning. And his brilliant new book *The Complacent Class* has been on my nightstand after I devoured it. In one sitting I am at round the clock Cowen saturation right now. Malcolm Gladwell: Since Alexis de Tocqueville, restlessness has been accepted as a signature American trait. Our willingness to move, take risks and adapt to change have produced a dynamic economy and a tradition of innovation from Ben Franklin to Steve Jobs. The problem, according to legendary blogger, economist and best-selling author Tyler Cowen, is that Americans today have broken from this tradition. We're working harder than ever to avoid change. We're moving residences less, marrying people more like ourselves and choosing our music and our mates based on algorithms that wall us off from anything that might be too new or too different. Match.com matches us in love. Spotify and Pandora match us in music. Facebook matches us to just about everything else. Of course this matching culture brings tremendous positives: music we like, partners who make us happy, neighbors who want the same things. We're more comfortable. But according to Cowen, there are significant collateral downsides attending this comfort: heightened inequality and segregation and decreased incentives to innovate and create. *The Complacent Class* argues that this cannot go on forever. We are postponing change due to our near-sightedness and extreme desire for comfort, but ultimately this will make change when it comes harder. The forces unleashed by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis, impossibly expensive rentals for

our most attractive cities worsening of residential segregation and a decline in our work ethic The only way to avoid this difficult future is for Americans to force themselves out of their comfortable slumber to embrace their restless tradition again

Law and Regulation of Mobile Payment Systems Joy Malala, 2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa In Kenya the introduction of M Pesa a new financial services model has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya

Urban Subversion and the Creative City Oli Mould, 2015-03-27 Check out the author s video to find out more about the book <https://vimeo.com/124247409> This book provides a comprehensive critique of the current Creative City paradigm with a capital C and argues for a creative city with a small c via a theoretical exploration of urban subversion The book argues that the Creative City with

a capital C is a systemic requirement of neoliberal capitalist urban development and part of the wider policy framework of creativity that includes the creative industries and the creative class and also has inequalities and injustices in built The book argues that the Creative City does stimulate creativity but through a reaction to it not as part of it Creative City policies speak of having mechanisms to stimulate individual collective or civic creativity yet through a theoretical exploration of urban subversion the book argues that to be truly creative is to be radically different from those creative practices that the Creative City caters for Moreover the book analyses the role that urban subversion and subcultures have in the contemporary city in challenging the dominant political economic hegemony of urban creativity Creative activities of people from cities all over the world are discussed and critically analysed to highlight how urban creativity has become co opted for political and economic goals but through a radical reconceptualisation of what creativity is that includes urban subversion we can begin to realise a creative city with a small c

transfer of land from agrarian constituencies to infrastructural promoters and urban developers the reallocation of property control is erupting into volatile land based social conflicts In *Shareholder Cities* Sai Balakrishnan argues that some of India's most decisive conflicts over its urban future will unfold in the regions along the new economic corridors where electorally strong agrarian propertied classes directly encounter financially powerful incoming urban firms Balakrishnan focuses on the first economic corridor the Mumbai Pune Expressway and the construction of three new cities along it The book derives its title from a current mode of resolving agrarian urban conflicts in which agrarian landowners are being transformed into shareholders in the corridor cities and the distributional implications of these new land transformations Shifting the focus of the study of India's contemporary urbanization away from megacities to these in between corridor regions Balakrishnan explores the production of uneven urban development that unsettles older histories of agrarian capitalism and the emergence of agrarian propertied classes as protagonists in the making of urban real estate markets *Shareholder Cities* highlights the possibilities for a democratic politics of inclusion in which agrarian urban encounters can create opportunities for previously excluded groups to stake new claims for themselves in the corridor regions
