Markets and People World Bank, 2020-02-10 Romania's income per capita has increased from 26 percent of the EU 28 average in 2000 to 63 percent in 2017 but this economic success rests on the wobbly foundations of unfavorable demographics weak human capital and ineffective institutions Going forward stronger competition and better human capital are critical to increasing the economy's growth potential Romanian manufacturing firms are exposed to domestic and international competition ensuring the flow of resources and market shares to more efficient players This has not been the case for services where anticompetitive regulations and direct state control often limit efficiency gains Romanian state owned enterprises do not compete on an equal footing with private sector firms distorting market outcomes and hampering the efficient allocation of resources Removal of these restrictions would have a significant positive impact on GDP growth Competitively neutral policies are needed to ensure that all enterprises public or private domestic or foreign face the same set of rules Romania's human capital accumulation proxied by the World Bank's Human Capital Index HCI is the lowest in the European Union and varies widely across counties Disparities in education outcomes remain relevant across and within regions of Romania Learning gaps in primary and secondary education persist These can be seen clearly between urban and rural areas across regions and across social groups requiring changes both at the systems level and at the learning center level In the labor market the automation of production processes has started driving demand for higher
