**Distance, Rating Systems and Enterprise Finance** Franz Flögel,2018-07-27 In response to the credit crunch during the global financial crisis of 2007 2008 many have called for the re establishment of regional banks in the UK and elsewhere In this context Germany s regional banking system with its more than 1 400 small and regional savings banks and cooperative banks is viewed as a role model in the financing of small and medium sized enterprises SMEs However in line with the death of distance debate the universal application of ICT based scoring and rating systems potentially obviates the necessity for proximity to reduce information asymmetries between banks and SMEs calling into question the key advantage of regional banks Utilising novel ethnographic findings from full time participant observation and interviews this book presents intimate insights into regional savings banks and compares their SME lending practices with large nationwide operating commercial banks in Germany The ethnographic insights are contextualised by concise description of the three pillar German banking system covering bank regulation structural and geographical developments and enterprise finance Furthermore the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the ontological foundation of new realism

Ethnographic findings reveal varying distances of credit granting depending on the rating results i.e. large banks allocate considerable credit granting authority to local staff and therefore challenge the proximity advantages of regional banks. Nevertheless, by presenting case studies of lending to SMEs, the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected.

Handbook of Academic Integrity Sarah Elaine Eaton, 2023-12-04. The book brings together diverse views from around the world and provides a comprehensive overview of academic integrity and how to create the ethical academy. At the same time, the Handbook does not shy away from some of the vigorous debates in the field, such as the causes of academic integrity breaches. There has been an explosion of interest in academic integrity in the last 20-30 years. New technologies that have made it easier than ever for students to cut and paste, coupled with global media scandals of high-profile researchers behaving badly, have resulted in the perception that plagiarism is on the rise. This, in combination with the massification and commercialisation of higher education, has resulted in a burgeoning interest in the importance of academic integrity, how to safeguard it, and how to address breaches appropriately. What may have seemed like a relatively easy topic to address—students copying sources without attribution—has in fact turned out to be a complex interdisciplinary field of research requiring contributions from linguists, psychologists, social scientists, anthropologists, teaching and learning specialists, mathematicians, accountants, medical doctors, lawyers, and philosophers, to name just a few. Because of this broad interest and input, this handbook serves as the single authoritative reference work which brings

together the vast growing interdisciplinary and at times contradictory body of literature For both established researchers practitioners and those new to the field this Handbook provides a one stop shop as well as a launching pad for new explorations and discussions     The Governance of Credit Rating Agencies Andrea Miglionico, The global crisis revealed that credit rating agencies CRAs are capable of bringing about potential distortions in the financial sector thereby resulting in a reduction in market confidence which in turn influences negotiations and expectations CRAs need to be held accountable for lack of transparency and inaccurate ratings however the existing regulatory framework does not secure adequate investor protection This book provides a new and important contribution to research in the area at a crucial time in the debate around financial regulation and investment regimes     **Vietnam** ,2024-09-09 In the late 1980s most of the world still associated Vietnam with resistance and war hardship refugees and a mismanaged planned economy During the 1990s by contrast major countries began to see Vietnam as both a potential partner and a strategically significant actor particularly in the competition between the United States and an emerging China and international investors began to see Vietnam as a land of opportunity

**The School Discipline Consensus Report** CSG Justice Center, The School Discipline Consensus Report presents a comprehensive set of consensus based and field driven recommendations to improve conditions for learning for all students and educators better support students with behavioral needs improve police schools partnerships and keep students out of the juvenile justice system for minor offenses More than 100 advisors representing policymakers school administrators teachers behavioral health professionals police court leaders probation officials juvenile correctional leaders parents and youth from across the country helped develop more than two dozen policies and 60 recommendations to keep more students in productive classrooms and out of court rooms     European Contract Law in a Changed Banking and Financial Architecture Stefan Grundmann,Pietro Sirena,2024-09-16 The European Banking Union forms the answer of the EU to the global financial crisis strongly increasing own funds basis for more robust credit institutions installing a recovery and resolution regime with strong planning and preventive measures and opting for the supervisory with the broadest reach the European Central Bank The first part of the book after the design of the overall architecture and a clarification of the main policy lines and theoretical underpinnings describes the main features of this regime It does so in particular for recovery tools and their conceptual novelty focusing on private claims within the regime namely within deposit guarantee schemes and for liability of supervisory authorities The main question asked in the volume is however in what respects this new regime changed European Contract Law The answer is two fold and this is the focus of the still more extensive second part The first answer is that the main thrust stability first and no socialization of costs and privatization of gains constitutes a novel approach a clear dedication to the prevalence of the public good This is a thrust which with corporate social responsibility responsibility driven lending and similar will become the main development in the 2010s and 2020s One can speak of a green box approach that establishes clear firm holds within an area characterized by autonomous choice free

markets including the Internal Market The second answer is more multi faceted The range of possibilities of private party claims and participation rights rises enormously as it did before in other regulatory areas namely in competition law with intervention of the CJEU and the EU legislature This ranges from credit institutions themselves more actively contributing to best practices and self regulation to claims of private parties creditors customers against credit institutions not complying with the regulatory regime and finally enhanced procedures for enforcement by private parties as private advocates general The volume closes with a case study of the Foreign Currency Loans crisis namely in Central Europe which may also become a huge test case for the new architecture but at least raises parallel questions With Contributions by Esther Arroyo Universitat de Barcelona Alessandra De Aldisio Senior advisor Banca d Italia Nikolai Badenhoop Leibniz Institute for Financial Research SAFE Frankfurt Ewa Baginska University of Gdansk Fran ois Barri re University of Lumi re Lyon II Stefan Grundmann Humboldt University Carlo Lanfranchi Banca d Italia Moritz Renner University of Mannheim Michael Schillig King s College London Pietro Sirena Bocconi University and Piotr Tereszkiewicz Jagellonian University
