Achieving Balance through Efficiency Stephen Dimeo,2020-01-01 Those starting a career in teaching will put in an incredible amount of energy into their practice in order to learn their craft and become respected professionals In many cases however this energy is not enough to survive as a teacher Currently 1 in 5 new teachers will leave the profession after five years The purpose of this book is to improve the survivability of early career teachers by focusing on one key area Efficiency or what is referred to as Time Management This book will examine how teachers can become more efficient in their lesson and unit planning classroom organization assessment of their students how they interact with parents and even when they search and interview for a job Special emphasis is placed on one of the most challenging aspects of teaching classroom behavioral management The underlying basis for this book is a deep belief that successfully managing time will allow teachers to create a positive balance between one s professional and personal lives It is all too common to see time stressed and sleep exhausted teachers lose sight of the reasons they entered teaching eventually falling out of love with their subject and those they teach This book will tackle head on the demands that teachers face by posing many detailed practical solutions to time management problems in a variety of different contexts These solutions will not only come from the author s own experience preparing New York City science students for over 25 years but from researchers and veteran teachers and administrators who have published their findings and advice in leading educational journals It is time to stop procrastinating and draw upon your inner grit to create order routines and systems that can be used successfully in your teaching profession

Algorithms and Complexity in Mathematics, Epistemology, and Science Nicolas Fillion,Robert M. Corless,Ilias S. Kotsireas,2019-02-07 ACMES Algorithms and Complexity in Mathematics Epistemology and Science is a multidisciplinary

conference series that focuses on epistemological and mathematical issues relating to computation in modern science This volume includes a selection of papers presented at the 2015 and 2016 conferences held at Western University that provide an interdisciplinary outlook on modern applied mathematics that draws from theory and practice and situates it in proper context These papers come from leading mathematicians computational scientists and philosophers of science and cover a broad collection of mathematical and philosophical topics including numerical analysis and its underlying philosophy computer algebra reliability and uncertainty quantification computation and complexity theory combinatorics error analysis perturbation theory experimental mathematics scientific epistemology and foundations of mathematics By bringing together contributions from researchers who approach the mathematical sciences from different perspectives the volume will further readers understanding of the multifaceted role of mathematics in modern science informed by the state of the art in mathematics scientific computing and current modeling techniques
