**Gendering the Settler State** Kate Law, 2015-11-06. White women cut an ambivalent figure in the transnational history of the British Empire. They tend to be remembered as malicious haridans personifying the worst excesses of colonialism as vacuous fusspots whose lives were punctuated by a series of frivolous pastimes or as casualties of patriarchy constrained by male actions and gendered ideologies. This book, which places itself amongst other new imperial histories, argues that the reality of the situation is of course much more intricate and complex. Focusing on post-war colonial Rhodesia, *Gendering the Settler State* provides a fine-grained analysis of the roles of white women in the colonial enterprise, arguing that they held ambiguous and inconsistent views on a variety of issues, including liberalism, gender, race, and colonialism.

*Chemical Control* Michael Crowley, 2016-01-26. This thoroughly researched study highlights the international community's failure to regulate contemporary state research, development, marketing, and/or deployment of riot control agents and incapacitating chemical agent weapons.

Report of the Auditor-General for the Financial Year Ended ... Zimbabwe, 2015. *The Misery of International Law* John Linarelli, Margot E. Salomon, Muthucumaraswamy Sornarajah, 2018-03-23. Poverty, inequality, and dispossession accompany economic globalization. Bringing together three international law scholars, this book addresses how international law and its regimes of trade, investment, finance, as well as human rights, are implicated in the construction of misery and how international law is producing, reproducing, and embedding injustice and narrowing the alternatives that might really serve humanity. Adopting a pluralist approach, the

authors confront the unconscionable dimensions of the global economic order the false premises upon which they are built and the role of international law in constituting and sustaining them Combining insights from radical critiques political philosophy history and critical development studies the book explores the pathologies at work in international economic law today International law must abide by the requirements of justice if it is to make a call for compliance with it but this work claims it drastically fails to do so In a legal order structured around neoliberal ideologies rather than principles of justice every state can and does grab what it can in the economic sphere on the basis of power and interest legally so and under colour of law This book examines how international law on trade and foreign investment and the law and norms on global finance has been shaped to benefit the rich and powerful at the expense of others It studies how a set of principles in the form of a New International Economic Order NIEO that could have laid the groundwork for a more inclusive international law without even disrupting its market orientation were nonetheless undermined As for international human rights law it is under the terms of global capitalism that human rights operate Before we can understand how human rights can create more just societies we must first expose the ways in which they reflect capitalist society and how they assist in reproducing the underlying terms of immiseration that will continue to create the need for human rights protection This book challenges conventional justifications of economic globalization and eschews false choices It is not about whether one is for or against international trade foreign investment or global finance The issue is to resolve how if we are to engage in trade investment and finance we do so in a manner that is accountable to persons whose lives are affected by international law The deployment of human rights for their part must be considered against the ubiquity of neoliberal globalization under law and not merely as a discrete benevolent response to it

**Orphan Crops: Breeding and Biotechnology for Sustainable Agriculture, Food and Nutrition** Simon E. Bull, Jill Margaret Farrant, Rita Hogan Mumm, Zerihen Tadele, 2024-01-18 Orphan crops play an important role in food and nutrition security especially in growing economies where small holder farmers produce the majority of food Despite their importance in global agriculture and their often remarkable nutrient content and adaptation to challenging environmental conditions orphan crops have received limited attention by the scientific community and industry However the diversity of neglected plant species provides a large genetic resource that could significantly contribute to broadening the biodiversity of trait desired crops for novel value chains sustainable development and food security The uptake of new plant breeding techniques notably genome editing as

well as omic tools are now accelerating translation of basic research and facilitating the exploration of orphan crops. These advancements also give rise to public and political engagement discussions to maximize socio-economic impact. Given that the greatest need for food and nutritional security is in growing economies, issues of food sovereignty and sustainability of their food systems become front and centre. There is now an exceptional opportunity to tackle some of the major current challenges in agriculture including climate change, sustainable cropping systems, food quality and nutritional security through broadening research in wild relatives of crops and on orphan species. This Research Topic seeks to showcase research on neglected plants using advanced molecular technologies e.g. genome sequencing, omics etc. and new plant breeding approaches, methods and tools.
