Briefs, 1920 States of Childhood Jennifer S. Light, 2020-07-14 How virtual adulthood children's role play in simulated
cities states and nations helped construct a new kind of sheltered childhood for American young people A number of curious
communities sprang up across the United States in the late nineteenth and early twentieth century simulated cities states
and nations in which children played the roles of legislators police officers bankers journalists shopkeepers and other adults
They performed real work passing laws growing food and constructing buildings among other tasks inside virtual worlds In
this book Jennifer Light examines the phenomena of junior republics and argues that they marked the transition to a new
kind of sheltered childhood for American youth Banished from the labor force and public life children inhabited worlds that
mirrored the one they had left Light describes the invention of junior republics as independent institutions and how they
were later established at schools on playgrounds in housing projects and on city streets as public officials discovered children's
role playing helped their bottom line The junior republic movement aligned with cutting edge developmental psychology
and educational philosophy and complemented the era's fascination with models and miniatures shaping educational and
recreational programs across the nation Light's account of how earlier generations distinguished real life from role playing
reveals a hidden history of child labor in America and offers insights into the deep roots of such contemporary concepts as
