

Secure Services Gateway 5

Getting Started

Use the instructions in this guide to help you connect your Secure Services Gateway (SSG) 5 device to your network. For additional configuration information, see the *SSG 5 Hardware Installation and Configuration Guide*. (This guide uses a version of the SSG 5-WLAN device to illustrate basic network connectivity.)

CONNECTING THE DEVICE

Use the network diagram above and the instructions below to connect and set up the SSG 5 device to protect your network. Use the LEDs on the front panel of the device to help you determine its status.

Step 1

Connect the workstation to the device using either of the following methods:

- Connect an Ethernet cable from one of the Trusted ports labeled 0/2 — 0/6 to the Ethernet port on the workstation. [We recommend this connection method.]
- Connect an Ethernet cable from the console port to an RJ-45-to-DB-9 adapter which then connects to the serial port on the workstation. [RJ-45-to-DB-9 adapters can be purchased from Juniper Networks. Refer to the *SSG 5 Hardware Installation and Configuration Guide* for RJ-45-to-DB-9 adapter pin numbering information.]

Step 2

Connect the device to a power source using the supplied power cable. [We recommend using a surge protector.] Confirm that the following LEDs are working correctly:

- Ensure that the POWER LED glows green. This indicates that the device is receiving power.

- After the device starts (about 2 minutes), ensure that the STATUS LED blinks green. This indicates that the device is operating normally.
- Ensure that the Link Activity LEDs glow green for the connected Ethernet ports. This indicates that the device has network connectivity.

Step 3

Configure the workstation to access the device through a browser:

- Ensure that the workstation is properly connected to the device using one of the methods presented in step 1.
- Change the TCP/IP settings of the workstation to automatically obtain its IP address from the device using DHCP. For help, see the operating system documentation for the workstation.

Note: Ensure that your internal network does not already have a DHCP server.

- If necessary, restart the workstation to enable the changes to take effect.

You can use the Initial Configuration Wizard (ICW) to configure the SSG 5 device. Before starting the ICW, decide how you want to deploy your device. (For additional information, see the *SSG 5 Hardware Installation and Configuration Guide*.)
