Terio, 2011-04-19 This book provides part of the story about the Park Family of Georgia and certain events that happens to them during the War of the Federal Aggression Most people are taught in school to call it The War Between the States February 1861 to May 1865 I have always been told in my family that it was not a civil war since a civil war is a war within a state between people residing in that state The War Between the States comprised individual states declaring for Northern or Southern causes and loyalties During this time there was a higher degree of loyalty to one's state much more than to the new United States How can I share the story of the Park family and make it as exciting and interesting as it truly is Certain family stories are based on the papers of Anita Pressley a great great granddaughter of Joseph Park one of the three brothers who moved to Georgia Her papers include notes from family Bibles oral accounts from descendants still residing in Greene County in the early 1920s and 1930s and other relatives living throughout Georgia

Atomic Fragments Mary Palevsky, 2000-06-29 More than most of us Mary Palevsky needed to come to terms with the moral complexities of the atomic bomb Her parents worked on its development during World War II and were profoundly changed by that experience After they died unanswered questions sent their daughter on a search for understanding This compelling sometimes heart wrenching chronicle is the story of that quest It takes her and us on a journey into the minds memories and emotions of the bomb builders Scientists Hans Bethe Edward Teller Joseph Rotblat

Herbert York Philip Morrison and Robert Wilson and philosopher David Hawkins responded to Palevsky's personal approach in a way that dramatically expands their previously published statements. Her skill and passion as an interlocutor prompt these men to recall their lives vividly and to reexamine their own decisions debating within themselves the complex issues raised by the bomb. The author herself seeking to comprehend the widely differing ways in which individual scientists made choices about the bomb and made sense of their work deeply reconsiders those questions of commitment and conscience her parents faced. In personal vignettes that complement the interviews she captures other remembrances of the bomb through commemorative events and chance encounters with people who were there. Her concluding chapter reframes the crucial moral questions in terms that show the questions themselves to be the abiding legacy we all share. This beautifully written book bridges generations to make its readers participants in the ongoing dialogue about science and philosophy war and peace.
