Student: Explanation: Rock Cycle

Abstract: The authors present a preliminary investigation of the effects of a 12-week, supervised, low-impact aerobically demanding exercise program on the health and fitness of 10 sedentary, middle-aged women. The program was designed to be safe and effective for this population. The results of the study show that the program was well tolerated and resulted in significant improvements in cardiovascular fitness, body composition, and health-related quality of life. The authors conclude that a supervised, low-impact exercise program can be an effective means of improving the health and fitness of sedentary, middle-aged women.

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning, Killham et al 2014, Wong et al 2018, PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments. Molnar et al 2021, Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self efficacy. Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004. Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research based foundation. *Earth & Space Grade 7* Bellaire, Tracy, The activities in this book have two intentions: to teach concepts related to earth and space science and to provide students the opportunity to apply necessary skills needed for mastery of science and technology curriculum objectives. Throughout the experiments, the scientific method is used. In each section, you will find teacher notes designed to provide guidance with the learning intention, the success criteria, materials needed, a lesson outline, as well as provide insight on what results to expect when the experiments are conducted. Suggestions for differentiation are also included so that all students can be successful in the learning environment. Topics covered include Heat in the Environment, Energy, Sustainability, and Stewardship, Systems and Interactions. 96 Pages.
