Glencoe Warm-up

When scientists report a value, they have to take several things into consideration. Sometimes values are very large or small. In this case, scientists can use shorthand called **scientific notation** to report the value. Scientists also must consider how precise their value is. The precision of a measurement can be shown by the number of **significant digits** in the value.

To begin, check that the Burj Khalifa question is shown. Drag the three files shown below to determine the tower's height in micrometers. The answer is given in scientific notation.

628,000,000 micrometers	1000 Micrometers 1 Millimeter	1000 Millimeters 1 Meter	1 Meter = 1,000,000 micrometers	is 6.28×10^7 micrometers
-------------------------	----------------------------------	-----------------------------	---------------------------------	-----------------------------------

- The Burj Khalifa is 628,000,000 micrometers tall. How is this value written in scientific notation in the Glencoe™? _____
- In a value, any non-zero digit is considered a significant digit. (Zeros may or may not be significant.) What is the minimum number of significant digits in 628,000,000? _____
