**Christian P. Sorace**

## **Geofile Sichuan Earthquake:**

*The Politics of Crisis Management in China* Sonny Shiu-Hing Lo, 2014-11-14 This book analyzes the ways in which the Chinese government and military responded to the 2008 Wenchuan earthquake in Sichuan province. It adopts a comparative and historical perspective in studying the responses of the Chinese government in the first critical 72 hours, the mobilization of the People's Liberation Army and its difficulties, the assertive and important role of the non-governmental groups which established a partnership with the state in the rescue operations and the process and politics of reconstruction. The book is rich in materials including comparative case studies of the Tangshan earthquake in 1976, the outbreak of the Severe Acute Respiratory Syndrome in 2003, the earthquakes in Haiti, Chile and Myanmar, and the contrasts with the Japanese earthquake tsunami in 2011. Researchers, government officials, policy analysts, seismic specialists, journalists and students will find this book extremely useful, conceptually insightful and practically policy relevant.

**The Wenchuan Earthquake of 2008** Yong Chen, David C. Booth, 2012-09-11 The Wenchuan Earthquake of 2008: Anatomy of a Disaster gives a detailed account of the damage, seismology and tectonics of the event and discusses earthquake prediction, seismic hazard and risk management, the creation and implementation of building codes and new practices used in rescue, relief and reconstruction. It will be of significant interest to researchers and practitioners engaged in seismology, geophysics, engineering, the social sciences and disaster management and recovery. It also offers a valuable new and unique Chinese perspective with many insights for future mitigation of earthquake risk. Professor Yong Chen works for the China Earthquake Administration. Dr David C Booth works for the British Geological Survey.

Earthquake lessons from China Chen, Kevin Z, Zhang, Qiang, Hsu, Claire, 2016-04-13 The Wenchuan County earthquake of 2008 was the most severe earthquake as measured in sheer magnitude in the history of the People's Republic of China. Killing almost 90,000 people and creating economic losses of 84.5 billion yuan (US 13.2 billion), the earthquake also elicited a vigorous response from various government agencies, private businesses and nongovernmental organizations (NGOs). The ways these actors responded to the earthquake proved effective in distributing appropriate aid to those in need and the areas where the actors' earthquake response needs to be improved are discussed and analyzed in *Earthquake Lessons from China: Coping and Rebuilding Strategies*. The authors identify three earthquake responses that proved helpful to earthquake-affected communities: the use of a pair-wise aid policy in which a donor province or city is assigned to give aid to a particular earthquake-affected area; expanded NGO and volunteer involvement; and various kinds of public financial aid to earthquake-affected households. They also pinpoint areas that need further work: public aid specifically for home reconstruction, which has been inadequate; and the capacity of local communities to manage their own disaster responses, which is too low. Perhaps most important, the authors found that the high levels of NGO and volunteer involvement in disaster response should be expanded and sustained beyond what they were in the aftermath of the 2008 earthquake. The authors believe that increased nonpublic sector involvement can not only improve the

level of response to natural disasters but also foster a robust civil society and grassroots democracy in China      **The Politics of Crisis Management in China** Shiu Hing Lo, 2014 This book analyzes the ways in which the Chinese government and military responded to the 2008 Wenchuan earthquake in Sichuan province It adopts a comparative and historical perspective in studying the responses of the Chinese government in the first critical 72 hours the mobilization of the People's Liberation Army and its difficulties the assertive and important role of the non governmental groups which established a partnership with the state in the rescue operations and the process and politics of reconstruction The book is rich in materials including comparative case studies of the Tangshan earthquake in 1976 the outbreak of the Severe Acute Respiratory Syndrome in 2003 the earthquakes in Haiti Chile and Myanmar and the contrasts with the Japanese earthquake tsunami in 2011 Researchers government officials policy analysts seismic specialists journalists and students will find this book extremely useful conceptually insightful and practically policy relevant      **Unshakeable Sichuan** Jing Fu, 2010

**Shaken Authority** Christian P. Sorace, 2017-05-09 No detailed description available for Shaken Authority

**Earthquake Lessons from China** Kevin Chen, Qiang Zhang, Claire Hsu, 2016-05-30 Wenchuan County in the Sichuan Province of China was struck on May 12 2008 by an earthquake that measured 8.0 on the Richter scale the largest earthquake in the history of the People's Republic of China Almost 90 000 people including more than 5 000 children died or disappeared as a result of the quake which encompassed 500 000 square kilometers and affected nine other provinces outside Sichuan Economic losses came to renminbi RMB 845 billion US 132 billion      **Government Response to Natural Disasters** Pik Kei Peggy Wong, University of Manchester. School of Mechanical, Aerospace and Civil Engineering, 2008

**Earthquake and Disaster Risk: Decade Retrospective of the Wenchuan Earthquake** Yong-Gang Li, 2019-05-15 This book presents review papers and research articles focusing on the 2008 Wenchuan earthquake in Sichuan China discussing cross disciplinary and multiple thematic aspects of modern seismological geophysical geological and stochastic methodology and technology Resulting from international and regional earthquake research and disaster mitigation collaborations and written by international authors from multiple institutions and disciplines it describes methods and techniques in earthquake science based on investigations of the Wenchuan earthquake It also includes extensive reference lists to aid further research The book helps both senior researchers and graduate students in earthquake science to broaden their horizons in data analysis numerical modeling and structural retrieval for the tectonic geological geophysical and mechanical interpretation of the 2008 M8 Wenchuan earthquake to support a global and regional cooperation for preparedness and the mitigation and management of seismic risk      Rebirth of Our Land: Creating a More Beautiful Sichuan Sichuan Provincial Post-Wenchuan Earthquake Reconstruction Commission Office, 2012-06-07 The breathtaking story in words and images of the rebuilding of an earthquake devastated land The 2008 Wenchuan Earthquake was the worst earthquake in the history of the People's Republic of China and it stands as one of the greatest natural disasters of the 21st century The earthquake took the lives of

87 000 destroyed millions of homes and turned 500 000 square kilometers into a virtual wasteland The Sichuan province however has undergone a rebuilding of unprecedented scope Filled with full color photos of the land and people thriving after just four years The Rebirth of Our Land chronicles one of the most significant reconstruction efforts of all time as millions of men and women of China rallied together to rebuild Wenchuan from the ground up
