Origami8, Volume IV Guoxing Lu, Zhong You, Michael Assis, 2025-10-30 These four volumes of proceedings contain 126 papers contributed to the 8th International Meeting on Origami Science Mathematics and Education 8OSME held on 16-18 July 2024 at Swinburne University of Technology in Melbourne Australia. The papers represent current work in different disciplines of origami and they are grouped into four subject themes: Volume 1 Engineering I, Volume 2 Engineering II, Volume 3 Mathematics Computation History and Mental Health, and Volume 4 Design and Education. We witness increasing interests in origami from researchers, practitioners, and artists. Of a special note is the rapidly growing research in origami engineering, a distinctive field with fundamental concepts and applications related to space, mechanical, material, medical, and structural engineering, etc. Participants of 8OSME should find great passion and opportunity of collaborations across disciplines of origami. We hope these four volumes will inspire not just currently active researchers and artists but also the next generation of origami scientists, mathematicians, engineers, designers, historians, and teachers.

Discourse Perspective of Geometric Thoughts Sasha Wang, 2016-03-22 Sasha Wang revisits the van Hiele model of geometric thinking with Sfard's discursive framework to investigate geometric thinking from a discourse perspective. The author focuses on describing and analyzing pre-service teachers' geometric discourse across different van Hiele levels. The explanatory power of Sfard's framework provides a rich description of how pre-service teachers think in the context of quadrilaterals. It also contributes to our understanding of human thinking that is illustrated through the analysis of geometric discourse accompanied by vignettes.

Intelligent Tutoring Systems Barry P. Goettl, Henry M. Halff, Carol L. Redfield, Valerie J. Shute, 2003-06-29 The first International Conference on Intelligent Tutoring Systems ITS was held ten years ago in Montreal ITS 88. It was so well received by the international community that the organizers decided to do it again in Montreal four years later in 1992 and then again in 1996 ITS 98. ITS 98 differs from the previous ones in that this is the first time the conference has been held outside of Montreal and it's only been two years, not four, since the last one. One interesting aspect of the ITS conferences is that they are not explicitly bound to some organization, e.g., IEEE or AACE. Rather, the founder of these conferences, Claude Frasson, started them as a means to congregate researchers actively involved in the

ITS field and provide a forum for presentation and debate of the most currently challenging issues Thus the unifying theme is science This year s hot topics differ from those in the earlier ITS conferences as they reflect ever changing trends in ITS research A few of the issues being examined at ITS 98 include Web based tutoring systems deploying ITS in the real world tutoring and authoring tools architectures and knowledge structure and representation , **Math Connection™, Grade 4** ,2012-09-01 Providing focused practice to promote and foster math skills outlined by the NCTM each workbook is grade level appropriate with clear examples and easy to understand instructions on each page to reinforce the lesson
