Hegtvedt,Cathryn Johnson,2017-07-12 Social Psychology Individuals Interaction and Inequality invites you to take a sociological approach to the study of the individual in relationship to society This unique new text explains how social psychology provides varied yet interrelated explanations for individuals experiences in groups and how the micro level interactions of individuals have consequences for macro level phenomena within society Karen A Hegtvedt and Cathryn Johnson describe an array of processes that shape interaction given differences in status power or group memberships Unlike other social psychology texts theirs stresses the interconnections among these processes to create a story about how individuals perceive and then act in their social worlds In addition to introducing the central theoretical approaches and important empirical studies the authors also provide many examples that help students locate the substance of social psychology in their own experiences and social interactions In the end readers will gain an understanding of how their identities and perceptions shape what they do how the structures in which they are embedded may constrain or facilitate their behaviors and how these dynamics contribute to reinforcing or ameliorating inequalities in their social groups

Armed Conflict, Women and Climate Change Jody M. Prescott,2018-11-21 The gender differentiated and more severe impacts of armed conflict upon women and girls are well recognised by the international community as demonstrated by UN Security Council Resolution UNSCR 1325 on Women Peace and Security and subsequent resolutions Similarly the development community has identified gender differentiated impacts upon women and girls as a result of the effects of

climate change Current research and analysis has reached no consensus as to any causal relationship between climate change and armed conflict but certain studies suggest an indirect linkage between climate change effects such as food insecurity and armed conflict Little research has been conducted on the possible compounding effects that armed conflict and climate change might have on at risk population groups such as women and girls Armed Conflict Women and Climate Change explores the intersection of these three areas and allows the reader to better understand how military organisations across the world need to be sensitive to these relationships to be most effective in civilian centric operations in situations of humanitarian relief peacekeeping and even armed conflict This book examines strategy and military doctrine from NATO the UK US and Australia and explores key issues such as displacement food and energy insecurity and male out migration as well as current efforts to incorporate gender considerations in military activities and operations This innovative book will be of great interest to students and scholars of international relations international development international security sustainability gender studies and law

STEM Education in the Junior Secondary Robyn Jorgensen, Kevin Larkin, 2017-08-09 This book brings together a collection of internationally renowned authors in the STEM field to share innovations in the teaching of STEM It focuses on the junior secondary years of education students aged 11 15 since this is the age range in which students choose whether or not to formally opt out of STEM education It is here that the book makes a significant contribution to the field by integrating the STEM area and focusing on the junior years of schooling While developing this book the editors drew on two main premises Firstly STEM is seen as the integrated study of science technology engineering and mathematics in a coherent learning paradigm that is based on real world applications Secondly it is important to integrate digital technologies into STEM education beyond the superficial use of ICTs seen in many schools The book also addresses the challenges within STEM education many of which are long standing To this end it includes chapters on marginalised and diverse communities ensuring that a broad range of perspectives on STEM education is included

Beyond the Bubble Test Linda Darling-Hammond, Frank Adamson, 2014-06-16 Performance assessment is a hot topic in school systems and educators continue to analyze its costs benefits and feasibility as a replacement for high stakes testing Until now researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment Beyond the Bubble Test How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field and not a moment too soon Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy Instead teachers need to engage students in deeper learning assessing their ability to use higher order skills Skills like synthesizing information understanding evidence and critical problem solving are not achieved when we teach to multiple choice exams Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that

works better This book provides new perspectives on current performance assessment research plus an incisive look at what is possible at the local and state levels Linda Darling Hammond with a team of leading scholars bring together lessons learned new directions and solid recommendations into a single readily accessible compendium Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States This comprehensive resource also looks beyond our U S borders to Singapore Hong Kong and other places whose reform mindedness can serve as an example to us
