*Narrating the Soviet Era in Russian School History Textbooks* Olga Konkka, 2025-09-03 This study focuses on how Russian history textbooks published between 1992 and 2021 dealt with the topic of the Soviet period 1917-1991. Representations of this part of Russia's past in school manuals have provoked vivid debates and bolstered government intervention in the field while a gradual shift towards a less critical narrative of the USSR in more recent textbooks is often presented as directed by Vladimir Putin. This study combines research into these texts and inquiry into those who write, publish, approve or criticize them. Bringing together these perspectives provides a more complex view of school textbooks as final products of both top-down and bottom-up processes. This volume is aimed at postgraduate researchers and academics specializing in Soviet history, contemporary Russian politics and society and history education and textbooks. 2025-26

**The Global Testing Culture** William C. Smith,2016-01-04

The past thirty years have seen a rapid expansion of testing exposing students worldwide to tests that are now more than ever standardized and linked to high stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing across national contexts can be understood as a global testing culture The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality Underlying the global testing culture is a set of values identified from the increasing literature on world culture These include education as a human right academic intelligence faith in science decentralization and neoliberalism Each of these values highlights different aspects of the dialogue in support of high stakes standardized testing The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken for granted notion that such tests are effective and appropriate education practices However a large body of literature emphasizes the negative unintended consequences teaching to the test reshaping the testing pool the inequitable distribution of school resources and teachers attention and reconstructing the role of the student teacher and parent commonly found when standardized census based tests are combined with high stakes outcomes for educators or students This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts The volume makes it clear that testing per se is not the problem Instead it is how tests are administered used or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead

to its unintended undesirable consequences      **International Advanced Researches & Engineering Congress 2017 Proceeding Book** Recep HALICIOGLU, Hediye KIRLI AKIN, Yusuf FEDAI, 2017-12-29 INTERNATIONAL WORKSHOPS at IAREC 17 This book includes English main and Turkish languages International Workshop on Mechanical Engineering International Workshop on Mechatronics Engineering International Workshop on Energy Systems Engineering International Workshop on Automotive Engineering and Aerospace Engineering International Workshop on Material Engineering International Workshop on Manufacturing Engineering International Workshop on Physics Engineering International Workshop on Electrical and Electronics Engineering International Workshop on Computer Engineering and Software Engineering International Workshop on Chemical Engineering International Workshop on Textile Engineering International Workshop on Architecture International Workshop on Civil Engineering International Workshop on Geomatics Engineering International Workshop on Industrial Engineering International Workshop on Food Engineering International Workshop on Aquaculture Engineering International Workshop on Agriculture Engineering International Workshop on Mathematics Engineering International Workshop on Bioengineering Engineering International Workshop on Biomedical Engineering International Workshop on Genetic Engineering International Workshop on Environmental Engineering International Workshop on Other Engineering Science      **Disha Olympiad Champs Mathematics Class 8 with Chapter-wise Previous 12 Year (2013 - 2024) Questions 6th Edition | Complete Prep Guide with Theory, PYQs, Past & Practice Exercise | 2026 Exam** , The thoroughly Revised Updated 6th Edition of Olympiad Champs Mathematics Class 8 with Chapter wise Previous 12 Year 2013 2024 Questions is a complete preparatory book not only for Olympiad but also for Class 8 Mathematics Updated with Solved Questions of Previous 12 Years of the various Olympiad Exams from 2013 2024 As per the Latest Pattern issued by various Exam conducting bodies Past year Questions have been picked from the popular Olympiad Exams of SOF Silver Zone and Brain Mapping like IMO IOM etc in the 2 Exercises of every chapter Theory is presented in interesting simplified manner with the help of Teasers Do You Know Amazing Facts Illustrations which enriches reading experience for the children Practice Exercise questions are divided into two levels Level 1 and Level 2 Level 1 is the Beginner s level which comprises of questions like fillers analogy and odd one out Level 2 is the Advanced level which comprises of questions based on techniques like matching chronological sequencing picture passage and feature based statement correct incorrect integer based puzzle grid based crossword Venn diagram table chart based and much more Solutions and explanations are provided for all questions at the end of each Chapter The book is logically and pedagogically structured to enable easy learning and progress of young minds We are sure that with this book children will be able to Discover the True Champion in themselves      **Educational Research and Innovation Innovating Education and Educating for Innovation The Power of Digital Technologies and Skills** OECD, 2016-09-26 OECD s Innovation Strategy calls upon all sectors in the economy and society to innovate in order to foster productivity growth and well being Education
