Household Objects Shaped Like A Sphere:

The Authority of Everyday Objects Paul Betts, 2007-12-07 Paul Betts first came to my attention through his pioneering article on the post 1945 Bauhaus myth as a joint German American venture This book is a landmark study of cultural continuities and ruptures institutional realignments and individual careers that introduces a breath of fresh air into a field of research long staled by received ideas It demonstrates the rewards of approaching the years from 1933 to 1945 as a revealing window onto the subsequent history of West Germany Wolfgang Schivelbusch *The Authority of Everyday Objects* is a small gem of the new cultural history This is a work of striking originality and insight that fits the development of industrial design in postwar Germany into the country's broader social cultural and political history constructing an analytical narrative that carries from the Third Reich into the Cold War It illuminates not merely cultural transformation but the wider social history of twentieth century Germany Stanley G Payne author of *A History of Fascism 1914-1945* *The Authority of Everyday Objects* is a refreshing innovative and convincing approach to post World War II Western consumer society Design as a weapon in Cold War competition and as a vehicle for German redemption by revitalizing Bauhaus traditions is thoroughly researched and wonderfully presented in Paul Betts book This well illustrated work convinces the reader that design was a part of *gluecklich Leben* lucky life and *schoen wohnen* beautiful living and a factor in the politicization of material culture

Ivan T Berend author of *Decades of Crisis Central and Eastern Europe before World War II* and *History Derailed Central and Eastern Europe in the Long Nineteenth Century* **Informatics in Control, Automation and Robotics** Oleg

Everyday Objects William Henry Davenport Adams, 2015-02-24 Example in this ebook The very favourable reception accorded both by Press and Public to the Circle of the Year has induced me to prepare a second volume similar in design but dealing with different branches of the same subject As the former was founded on the first series of a popular French work *Les Saisons* by M Hoefer so the present has been suggested by the second series but in availing myself of it I have omitted much I have revised more and at various parts my additions have been considerable And here as in my former effort I have written from a popular rather than a scientific point of view It has not been my object to sketch the outlines or lay down the foundations of any

science but to show as best I could how much of wonder and beauty enters into our daily life and what inexhaustible sources of study lie at our very feet It is perhaps a misfortune of our common systems of education that they too much neglect the tuition of the eye that the young are not taught to mark the curious and interesting objects which are comprehended within their daily vision that they know so much about ancient mythology and so little about modern science so much about gods and heroes so little about stars and flowers I have called this volume *Everyday Objects* not because those which it describes may be seen every day but because they mostly belong to the region of the commonplace and familiar and I have called it *Picturesque Aspects of Natural History* because I have endeavoured in companionship with my French collaborateur to indicate the poetical side of the various sciences into which I have presumed to penetrate If it should awaken a love of nature in any breast or develop a spirit of inquiry which may lead the student further and further on the path of knowledge the labour bestowed upon these pages will not have been in vain The instinct of curiosity says M Hoefer in his preface to the first series of *Les Saisons* is the awakening of the intellectual life it commences with the lisping of the child accompanies the adult in every phase of his existence and far from becoming extinct with the last throb of the heart revives before the unknown shadows of the grave What then is there in the whole world of greater importance to follow and direct than the movements and impulses of this curiosity of these uncertain pulsations of the soul In this lies the secret of all education and upon education depends the future of humanity Unfortunately he continues the methods hitherto employed have been absolutely insufficient And the insufficiency is most notable as regards the imperfect and defective training given to the instinct of curiosity Observe the child Of everything which excites his attention he never fails to ask you the reason why It is thus that he enters into the connexion of cause and effect It is a sign But instead of following up this natural indication and developing the thought by the exercise of the reason we proceed as if the being under our charge were incapable of reason we overload the memory of the child with a multitude of words whose value he cannot understand until later in life and perhaps never The true direction of the mind is to proceed from the thought to the word and not from the word to the thought It is for want of having recognised and applied this principle that our educational systems have failed so utterly To be continue in this ebook

Scott Foresman-Addison Wesley Mathematics ,2008 **The Oxford Handbook of Shakespeare** Arthur F. Kinney,2012
 Contains forty original essays **Helping Children Learn Mathematics, 5th Australian Edition** Robert Reys,Mary Lindquist,Diana V. Lambdin,Nancy L. Smith,Anna Rogers,Leicha Bragg,Audrey Cooke,Melissa Fanshawe,Mark Gronow,2025-10-10 *Stuff Theory* Maurizia Boscagli,2014-03-27 Stuff the hoard of minor objects which have shed their commodity glamor but which we refuse to recycle flashes up in fiction films and photographs as alluring unruly reminder of how people and matter are intertwined Stuff is modern materiality out of bounds that refuses to be contained by the western semiotic system It declines its role as the eternal sidekick of the subject and is thus the ideal basis for a counter narrative of materiality in flux Can such a narrative developed by the new materialism reinvigorate the classical materialist account of

human alienation from commodities under capital By shifting the discussion of materiality toward the aesthetic and the everyday the book both embraces and challenges the project of new materialism It argues that matter has a politics and that its new plasticity offers a continued possibility of critique Stuff Theory's five chapters illustrate the intermittent flashes of modern minor materiality in twentieth century modernity as fashion memory object clutter home decor and waste in a wide range of texts Benjamin's essays Virginia Woolf's and Elfriede Jelinek's fiction Rem Koolhaas' criticism 1920s German photography and the cinema of Tati Bertolucci and Mendes To call the commodified ebullient materiality the book tracks stuff is to foreground its plastic and transformative power its fluidity and its capacity to generate events Stuff Theory interrogates the political value of stuff's instability It investigates the potential of stuff to revitalize the oppositional power of the object Stuff Theory traces a genealogy of materiality flashpoints of one kind of minor matter in a succession of cultural moments It asserts that in culture stuff becomes a rallying point for a new critique of capital which always works to reassign stuff to a subaltern position Stuff is not merely unruly it becomes the terrain on which a new relation between people and matter might be built

Redeeming Objects Natalie Scholz, 2023-09-12 Redeeming Objects traces the afterlives of things Out of the rubble of World War II and the Holocaust the Federal Republic of Germany emerged and with it a foundational myth of the economic miracle In this narrative a new mass consumer society based on the production export and consumption of goods would redeem West Germany from its Nazi past and drive its rebirth as a truly modern nation Turning this narrative on its head Natalie Scholz shows that West Germany's consumerist ideology took shape through the reinvention of commodities previously tied to Nazism into symbols of Germany's modernity economic supremacy and international prestige Postwar advertising film and print culture sought to divest mass produced goods such as the Volkswagen and modern interiors of their fascist legacies But Scholz demonstrates that postwar representations were saturated with unacknowledged references to the Nazi past Drawing on a vast array of popular and highbrow publications and films Redeeming Objects adds a new perspective to debates about postwar reconstruction memory and consumerism
