

**MARK SCHEME for the May/June 2014 series**

**0610 BIOLOGY**

**0610/61**

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

**The People and the Bay** Nancy B. Bouchier, Ken Cruikshank, 2016-01-15 This masterful social and environmental history raises questions about how decisions being made about the natural world today will shape the cities of tomorrow In 1865 John Smoke braved the ice on Burlington Bay to go spearfishing Soon after he was arrested by a fishery inspector and then convicted by a magistrate who chastised him for thinking that he was at liberty to do as he pleased with Her Majesty s property With this story Nancy Bouchier and Ken Cruikshank launch their history of the relationship between the people of Hamilton Ontario and Hamilton Harbour aka Burlington Bay From the time of European settlement through to the city s rise as an industrial power townsfolk struggled with nature and with one another to champion their particular vision of the bay as a place to live work and play As Smoke discovered the outcomes of those struggles reflected the changing nature of power in an industrial city From efforts to

conserve the fishery in the 1860s to current attempts to revitalize a seriously polluted harbour each generation has tried to create what it believed would be a livable and prosperous city

**Access to Justice** Ellie Palmer, Tom Cornford, Yseult Marique, Audrey Guinchard, 2016-01-28 Building on a series of ESRC funded seminars this edited collection of expert papers by academics and practitioners is concerned with access to civil and administrative justice in constitutional democracies where for the past decade governments have reassessed their priorities for funding legal services embracing new technologies that reconfigure the delivery and very concept of legal services cutting legal aid budgets and introducing putative cost cutting measures for the administration of courts tribunals and established systems for the delivery of legal advice and assistance Without underplaying the future potential of technological innovation or the need for a fair and rational system for the prioritisation and funding of legal services the book questions whether the absolutist approach to the dictates of austerity and the promise of new technologies that have driven the Coalition Government's policy can be squared with obligations to protect the fundamental right of access to justice in the unwritten constitution of the United Kingdom

**Parallel Computing: On the Road to Exascale** G.R. Joubert, H. Leather, M. Parsons, 2016-04-28 As predicted by Gordon E Moore in 1965 the performance of computer processors increased at an exponential rate Nevertheless the increases in computing speeds of single processor machines were eventually curtailed by physical constraints This led to the development of parallel computing and whilst progress has been made in this field the complexities of parallel algorithm design the deficiencies of the available software development tools and the complexity of scheduling tasks over thousands and even millions of processing nodes represent a major challenge to the construction and use of more powerful parallel systems This book presents the proceedings of the biennial International Conference on Parallel Computing ParCo2015 held in Edinburgh Scotland in September 2015 Topics covered include computer architecture and performance programming models and methods as well as applications The book also includes two invited talks and a number of mini symposia Exascale computing holds enormous promise in terms of increasing scientific knowledge acquisition and thus contributing to the future well being and prosperity of mankind A number of innovative approaches to the development and use of future high performance and high throughput systems are to be found in this book which will be of interest to all those whose work involves the handling and processing of large amounts of data
