Posthumanism Stefan Herbrechter, 2013-08-01 What does it mean to be human today The answer to this question which is as old as the human species itself is becoming less and less certain Current technological developments increasingly erode our traditional humanist reflexes consciousness emotion language intelligence morality humour mortality all these no longer demonstrate the unique character and value of human existence Instead the spectre of the posthuman is now being widely invoked as the inevitable next evolutionary stage that humans are facing Who comes after the human This is the question that posthumanists are taking as their starting point This critical introduction understands posthumanism as a discourse which in principle includes everything that has been and is being said about the figure of the posthuman It outlines the genealogy of the various posthuman scenarios in circulation and engages with their theoretical and philosophical assumptions and social and political implications It does so by connecting the philosophical debate about the future of humanity with a range of texts including examples from new media popular culture science and the media Science, Technology and Innovation Culture Marianne Chouteau, Joelle Forest, Céline Nguyen, 2018-10-08 We are facing unprecedented challenges today For many of us innovation would be our last hope But how can it be done Is it enough to bet on the scientific culture How can technical culture contribute to innovation How is technical culture situated with regards to what we name collectively the culture of innovation It is these questions that this book intends to address **La condition inhumaine** Ollivier Dyens, 2008 Quelle place pour l'homme dans un monde qui de plus en plus est dominé par la machine Est-il toujours la mesure de toute chose Ollivier Dyens se propose ici d'examiner l'enchevêtrement de l'humain et de la technologie qui définit selon lui la condition inhumaine Il montre que les technologies contemporaines remettent en question non seulement la perception que nous avons du monde mais aussi les universaux qui nous ont aidés à le rendre cohérent comment définir le vivant l'intelligence la conscience quand l'homme enfant et assisté par la machine lui ressemble de plus en plus Lucide mais sans s'effrayer il décrit très clairement cet cart entre la conscience que nous avons de nous-mêmes en tant qu'êtres biologiques et la conscience des strates infinies du réel fournie par la vie artificielle C'est bel et bien par les technologies au premier rang desquelles le langage que l'homme est pleinement homme la réalité technologique loin de nous faire découvrir un univers insens nous propose de lui réinventer un sens qui dépasse la perception biologique que nous en avons La condition inhumaine nous oblige ainsi repenser la condition humaine **Text and Image in Modern European Culture** Natasha Grigorian, Thomas Baldwin, Margaret Rigaud-Drayton, 2012 Text and Image in Modern European Culture is a collection of essays that are transnational and interdisciplinary in scope Employing a range of innovative comparative approaches to reassess and undermine traditional boundaries between art forms and national cultures the contributors shed new light on the relations between literature and the visual arts in Europe after 1850 Following tenets of comparative cultural studies work presented in this volume explores international creative dialogues between writers and visual artists ekphrasis in

La terreur et le sublime Ollivier Dyens, 2019-08-28T00:00:00-04:00 Comment vivre dans un monde qui connaît l'équivalent de 10 000 ans de progrès d'ici 2100 Comment penser et repenser la société face aux avancées des sciences et des technologies extraordinaires de l'intelligence artificielle Comment rendre ce monde inondé de technologies plus humain et plus habitable Ce livre aborde ces questions et propose d'innombrables pistes de solutions dont une alliance inédite entre notre intelligence et celle des machines qui ouvrirait la porte non seulement à une humanisation de l'intelligence artificielle mais aussi une amplification de notre cognition Une telle fusion favoriserait l'émergence de solutions aux défis immenses qui sont les nôtres mais comporterait aussi ses propres défis enjeux de surveillance programmation de l'éthique transformation radicale du monde du travail et enchevêtrement d'une perception managériale dans la sensibilité humaine C'est au cœur de ces tensions qu'il nous faudra apprendre vivre créer penser et duquer avec l'intelligence artificielle et ses algorithmes en marche vers une nouvelle ère

Mises en récit de la technique Marianne Chouteau, Céline Nguyen, 2011 **Demain les posthumains** Jean-Michel Besnier, 2012-10-03 L'homme créera-t-il la place dans un futur proche des créations de son invention : machines, organismes posthumains issus du croisement des biotechnologies, des nanotechnologies de l'intelligence artificielle et de la robotique Cette perspective est chaque jour un peu moins de la science-fiction et fait rêver les uns tandis qu'elle inquiète les autres De fait les spéculations sur les posthumains et l'humanité élargie capable d'inclure autant les animaux que les robots ou les cyborgs se déroulent en rupture avec la perspective qui a longtemps été celle de Descartes nous rendre maîtres et possesseurs de la nature C'est au contraire un monde de l'imprévisible du surgissement aléatoire qui se dessine rendant inutile ou vaine l'initiative humaine L'auteur propose ainsi de définir ce que serait une éthique déliée des mythes de l'humanisme classique l'interdit et l'obligation morale une éthique posthumaniste qui pourrait bien s'avérer nécessaire dans le monde d'aujourd'hui
