|       |                                                                                                                                                           |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| .     | Idle mode (Decimal blinks at 1 Hertz -- 0.5 second ON, 0.5 second OFF).                                                                                   |
| A     | Cubic feet per minute(cfm) setting for indoor blower (1 second ON, 0.5 second OFF) / cfm setting for current mode displayed.                              |
| C     | Cooling stage (1 sec. ON, 0.5 sec. OFF) 1 or 2 displayed / Pause / cfm setting displayed / Pause / Repeat codes.                                          |
| d     | Dehumidification mode (1 second ON, 1 second OFF) CFM setting displayed / Pause/ Repeat Codes.                                                            |
| H     | Gas Heat Stage (1 sec. ON, 0.5 sec. OFF) 1 or 2 displayed / Pause/ cfm displayed / Pause / Repeat codes. Blinking - Ignition.                             |
| h     | Heat Pump Stage.                                                                                                                                          |
| df    | Defrost mode.                                                                                                                                             |
| E 105 | Device communication problem - No other devices on RS Bus (Communication system).                                                                         |
| E 110 | Low line voltage.                                                                                                                                         |
| E 111 | Line voltage polarity reversed                                                                                                                            |
| E 112 | Ground not detected                                                                                                                                       |
| E 113 | High line voltage.                                                                                                                                        |
| E 114 | Line voltage frequency out-of-range.                                                                                                                      |
| E 115 | Low 24V - Control will restart if the error recovers.                                                                                                     |
| E 117 | Poor ground detected (Warning only).                                                                                                                      |
| E 120 | Unresponsive Device (Communicating only).                                                                                                                 |
| E 124 | Active communicating thermostat signal missing for more than 3 minutes.                                                                                   |
| E 125 | Control failed self-check, internal error, failed hardware. Will restart if error recovers.                                                               |
|       | Covers hardware errors (flame sense circuit faults, pin shorts) etc.                                                                                      |
| E 131 | Corrupted control parameters (Verify configuration of system - Communicating only).                                                                       |
| E 180 | Outdoor air temperature sensor failure.                                                                                                                   |
| E 200 | Hard lockout - Rollout circuit open or previously open.                                                                                                   |
| E 201 | Indoor blower communication failure - Unable to communicate with blower motor.                                                                            |
| E 202 | Indoor blower motor mis-match - Indoor motor horsepower does not match unit capacity.                                                                     |
| E 203 | Appliance capacity / size is NOT programmed. Invalid unit codes Refer to configuration flow chart installation instructions.                              |
| E 204 | Gas valve mis-wired.                                                                                                                                      |
| E 205 | Control gas valve relay contact shorted.                                                                                                                  |
| E 206 | Gas valve 2nd stage relay failure                                                                                                                         |
| E 207 | Hot surface ignitor sensed open - Refer to troubleshooting in installation instruction.                                                                   |
| E 223 | Low pressure switch failed open - Refer to troubleshooting in installation instruction.                                                                   |
| E 224 | Low pressure switch failed closed - Refer to troubleshooting in installation instruction.                                                                 |
| E 225 | High pressure switch failed open - Refer to troubleshooting in installation instruction.                                                                  |
| E 226 | High pressure switch failed closed - Refer to troubleshooting in installation instruction.                                                                |
| E 227 | Low pressure switch opened during trial for ignition or run mode - Refer to troubleshooting in installation instruction.                                  |
| E 229 | Ignition on high fire                                                                                                                                     |
| E 240 | Low flame current - Run mode - Refer to troubleshooting in installation instruction.                                                                      |
| E 241 | Flame sensed out of sequence - Flame still present.                                                                                                       |
| E 250 | Limit switch circuit open - Refer to troubleshooting in installation instruction.                                                                         |
| E 252 | Discharge air temperature too high (gas heat only).                                                                                                       |
| E 270 | Soft lockout - Exceeded maximum number of retries. No flame current sensed.                                                                               |
| E 271 | Soft lockout - Exceeded maximum number of retries. Last retry failed due to pressure switch opening.                                                      |
| E 272 | Soft lockout - Exceeded maximum number of retries. Last recycle failed due to pressure switch opening.                                                    |
| E 273 | Soft lockout - Exceeded maximum number of retries. Last recycle failed due to a flame failure.                                                            |
| E 274 | Soft lockout - Exceeded maximum number of retries. Last recycle failed due to the limit circuit opening or the limit remained open longer than 3 minutes. |
| E 275 | Soft lockout - Flame sensed out of sequence from code 241 fault. Flame signal is gone.                                                                    |
| E 290 | Ignitor circuit fault - Failed ignitor or triggering circuitry.                                                                                           |
| E 292 | Indoor blower motor unable to start - Seized bearings, stuck wheel, etc.                                                                                  |
| E 295 | Indoor blower motor temperature is too high.                                                                                                              |
| E 310 | Discharge temperature error sensor failure.                                                                                                               |
| E 311 | Heat rate reduced to match indoor blower air flow. Replace filter or repair duct restriction.                                                             |
| E 312 | Restricted air flow in cooling or continuous fan mode is lower than air flow settings.                                                                    |
| E 313 | Indoor or outdoor unit capacity mis-match - Communicating only.                                                                                           |
| E 331 | Global network connection - Communication link problem - Communicating only.                                                                              |
| E 344 | Relay Y1 stuck                                                                                                                                            |
| E 347 | No 24 Volt output on Y1 with non-communicating outdoor unit in Communicating.                                                                             |
| E 348 | No 24 Volt output on Y2 with non-communicating outdoor unit in Communicating.                                                                             |
| E 349 | No 24 Volts on R & O with non-communicating outdoor unit (Dual fuel module required for heat pump application).                                           |
| E 370 | Interlock switch sensed open for 2 mins.                                                                                                                  |
| E 401 | LSOM - Compressor ran over 18 Hours in air conditioning mode.                                                                                             |
| E 402 | LSOM - Outdoor unit system pressure trip.                                                                                                                 |
| E 403 | LSOM - Compressor short cycling (Running Less than 4 Minutes).                                                                                            |
| E 404 | LSOM - Compressor rotor locked.                                                                                                                           |
| E 405 | LSOM - Compressor open circuit.                                                                                                                           |
| E 406 | LSOM - Compressor open start circuit.                                                                                                                     |
| E 407 | LSOM - Compressor open run circuit.                                                                                                                       |
| E 408 | LSOM - Compressor contactor is welded.                                                                                                                    |
| E 409 | LSOM - Compressor low voltage.                                                                                                                            |

Press the push button and hold for the display symbol you wish to conduct and release.  
 E-Diagnostic Recall (Always displays). P-Flame Signal mode. P-Program unit capacity / size (See Instruction Manual).  
 Flame Signal mode is echoed:  
 -with power cycle / reset.  
 -by pressing & holding push button until 3 horizontal lines " " "  
 after 10 mins. of entering Flame Signal mode.  
 Diagnostic recall mode and a solid "c" clears the error history.  
 Must press and hold within 10 seconds while flashing "c" is displayed to clear error codes.  
 Refer to Installation Instructions for Field Test and Diagnostic MENU OPTIONS
