scientifique (France). Groupement de recherche 1170,2003 **Médecine de montagne** Jean-Paul Richalet,Jean-Pierre Herry,2017-09-26 De façon originale cette 5e édition propose une vision transdisciplinaire des dangers objectifs de l'environnement de montagne et des éléments de géographie physique et humaine en faisant appel des spécialistes des Sciences de la Terre membres du Comité scientifique du Club alpin français. Les actualités sont centrées en une décennie de montagne et les dernières données objectives sur l'impact du réchauffement climatique sur les activités sportives en montagne sont largement abordées ainsi que les diverses pathologies et traumatismes liés à l'altitude et au froid. Les auteurs insistent sur l'importance de la préparation physique sur la prévention des accidents et du secours en montagne et proposent des conseils pratiques pour favoriser une bonne approche de ce milieu passionnant mais potentiellement dangereux. Destiné aux nombreux décins de montagne et d'éditions ce livre s'adresse également tous les amateurs et professionnels de l'alpinisme de la randonnée et des expéditions et des trekkings. Ils trouveront en plus des données fondamentales des conseils pratiques sur tous les sports de montagne. Les auteurs Jean Paul Richalet est professeur des universités à l'UFR de la décennie de Bobigny Université Paris 13 directeur de l'Association pour la recherche en physiologie de l'environnement. Jean Pierre Herry est ancien membre du sport l'école nationale de ski et de l'alpinisme Chamonix. Un complément en ligne permet de compléter la lecture de façon pratique. Les différends territoriaux devant le juge international Géraldine Giraudeau,2012-12-03 Arbitral and judicial decisions dealing with territorial land and maritime disputes bear the mark of compromising. They draw boundaries situated between the respective pretensions of the parties and ensure an equitable share of spaces and resources. This phenomenon of compromising symptomatically appears in the jurisprudence dealing with territorial disputes because of their specific nature and the geostrategic economic and emotional factors at stake. It is also due to the remarkable flexibility of applicable norms and principles which provides a vast power of appreciation to the judge. This study enhances how the content of the decisions is used in order to reach a balanced solution and demonstrates that the international judge focuses on peacekeeping considerations. Les décisions arbitrales et judiciaires relatives aux différends territoriaux terrestres et maritimes sont marquées par une tendance transactionnelle. Elles consacrent des tracés frontaliers situés entre les revendications respectives des parties et assurent plus globalement un équitable partage des espaces et des ressources. Ce phénomène de compromis s'exprime symptomatiquement dans la jurisprudence relative aux différends territoriaux en raison de la nature de ces litiges et de leurs enjeux géostratégiques économiques et émotionnels. Il est aussi dû à la particulière flexibilité des règles et des principes applicables. Cette étude témoigne de l'instrumentalisation qui est faite du contenu des décisions juridictionnelles au profit de solutions équilibrées et démontre que le juge international est avant tout tourné vers la mission pacificatrice de son office.
