Cimbala, 2009-09-10 This book looks at the prospects for international cooperation over nuclear weapons proliferation in the 21st century Nuclear weapons served as stabilizing forces during the Cold War or the First Nuclear Age on account of their capability for destruction the fear that this created among politicians and publics and the domination of the nuclear world order by two superpowers the United States and the Soviet Union The end of the Cold War the dissolution of the Soviet Union and the potential for nuclear weapons acquisition among revisionist states or even non state actors including terrorists creates the possibility of a wolves eat dogs phenomenon in the present century In the 21st century three forces threaten to undo or weaken the long nuclear peace and fast forward states into a new and more dangerous situation the existence of large US and Russian nuclear weapons arsenals the potential for new technologies including missile defenses and long range precision conventional weapons and a collapse or atrophy of the nuclear nonproliferation regime and the opening of the door for nuclear weapons to spread among more than the currently acknowledged nuclear states This book explains how these three weakening forces interact with one another and with US and Russian policy making in order to create an environment of large possibilities for cooperative security but also of considerable danger Instead the choices made by military planners and policy makers will create an early twenty first century story privileging nuclear stability or chaos The US and Russia can and should make incremental progress in arms control and nonproliferation This book will be of much interest to students of nuclear proliferation and arms control strategic studies international security and IR in general Stephen J Cimbala is Distinguished Professor of Political Science at Pennsylvania State University He is the author of numerous works in the fields of international security defense studies nuclear arms control and other topics He has consulted for various US government agencies and defense contractors [Perspectives on World Politics](#) Richard Little, Michael Smith, 2006 This third edition substantially revised and updated takes full account of the literature on the post Cold War period and how theories have been influenced by events in the 1990s [Neoclassical realism in European politics](#) Asle Toje, Barbara Kunz, 2024-07-30 Realism is making a comeback in Europe This book brings together a new generation of realist scholars It provides a rigorous survey for specialists seeking to understand the dynamics of international relations in a time of change The volume thus seeks to explore the European dimension to neoclassical realism The hope with this book is that it will spark a debate that in time might lead to the re emergence of a distinctly European realist school which draws on

the roots of the historical non American realist tradition benefiting from insights in the liberal constructivist paradigm Through detailed case studies the book illustrates that power and influence remain fruitful even indispensable variables through which to understand the formation of foreign policy

Nuclear Weapons in the Information Age Stephen J. Cimbala, 2012-02-02 In today s information age the coexistence of nuclear weapons with advanced conventional weapons and information based concepts of warfare is a military contradiction Nuclear deterrence was initially predicated on geopolitical military and technical assumptions These were based on Cold War politics rational deterrence theory the concept of mutual vulnerability and the fact that information and technology diffusion were limited Today however far from being obsolete nuclear and other weapons of mass destruction have not only survived but have become weapons for states that face security threats including perceived threats of nuclear blackmail or expectation of conflicts This study focuses on this unplanned coexistence of two distinct arts of war including the possibility that states like the U S may be held hostage to nuclear blackmail by outlier regimes or terrorists such as North Korea It shows that restricting nuclear proliferation should still be on the agenda of policymakers and calls for a revitalized global nonproliferation regime This unique survey by a leading expert will appeal to anyone interested in arms control nuclear proliferation and defense policy

Billionaires in World Politics Peter Hägel,2020-12-07 Billionaires in World Politics shows how the privatization of politics assumes a new dimension when billionaires wield power in world politics which requires a re thinking of individual agency in International Relations Structural changes globalization neoliberalism competition states and global governance have generated new opportunities for individuals to become extremely rich and to engage in politics across borders The political agency of billionaires is being conceptualized in terms of capacities goals and power which is contingent upon the specific political field a billionaire is trying to enter Six case studies explore the power of billionaires in their pursuit of security wealth and esteem The chapter on security analyzes Raj Rajaratnam s relationship to the Tamil cause in Sri Lanka and Sheldon Adelson s transnational electioneering in the Israel Palestine conflict Regarding the economy the book studies how the Koch brothers political protection of fossil fuels is affecting climate change mitigation and how Rupert Murdoch s opinion shaping is valorizing conservatism across borders The chapter on social entrepreneurship and esteem examines the role of Bill Gates in the governance of global health and George Soros s attempts to build open societies as a stateless statesman An analytical conclusion evaluates the prior findings in order to address three major questions Is it more appropriate to see billionaires as super actors or as a global super class What is the relative power of billionaires within the international system What does the power of billionaires mean for the liberal norms of legitimate political order State Responses to Nuclear Proliferation Brian K. Chappell,2021-01-07 Contemporary fears of rogue state nuclear proliferation and nuclear terrorism pose unique challenges for the global community This book offers a unique approach by examining why states that have the military capability to severely damage a proliferating state s nuclear program instead choose to pursue coercive diplomacy The author argues cognitive psychological influences including the trauma derived from national tragedies like the September 11th attacks and the Holocaust and a history of armed conflict increase the threat perceptions of foreign policy

decision makers when confronting a state perceived to be challenging the existing power structure by pursuing a nuclear weapon The powerful state s degree of perceived threat combined with its national security policies military power projection capabilities and public support then influence whether it will take no action use coercive diplomacy sanctions or employ military force to address the weaker state s nuclear ambitions
