has authored more than 55 books and is the past president of the American Society for Quality **FinTech** Ross P. Buckley, Douglas W. Arner, Dirk A. Zetsche, 2023-11-23 In this comprehensive accessible work Ross P Buckley Douglas W Arner and Dirk A Zetsche offer an ideal reference for anyone seeking to understand the technological transformation of finance and the role of regulation the world of FinTech They consider FinTech technologies including artificial intelligence blockchain BigData cloud computing cryptocurrencies central bank digital currencies and distributed ledger technology and provide a unique perspective on FinTech as an interactive system involving finance technology law and regulation Starting with an evolutionary perspective the authors then consider the major technologies transforming finance arguing for approaches to balance the risks and challenges of innovation They address the central role of infrastructure in digital financial transformation highlighting lessons from China India and the EU as well as the impact of pandemics and other sustainability crises while considering the risks generated by FinTech They conclude by offering forward looking regulatory strategies to address the challenges facing our world today **Fintech Business Models** Matthias Fischer, 2021-02-08 This book on fintechs shows an international comparison on a global level It is the first book where 10 years of financing rounds for fintechs have been analyzed for 10 different fintech segments It is the first book to show the Canvas business model for fintechs Professionals and students get a global understanding of fintechs The case examples in the book cover Europe the U S and China Teaser of the OPEN vhb course Principles of Fintech Business Models <https://www.youtube.com/watch?v=UN38YmzzvXQ> Essentials on Dynamic Capabilities for a Contemporary World Bruno F. Abrantes, Jesper Lind Madsen, 2023-10-24 This book is about dynamic capabilities DCs in the context of the 21st century in which global challenges seem to come from different quadrants For instance an environmental threat to the planet s sustainability or technological advancements disrupting the traditional value chains call for new business models accompanying societal trends Although the usual approach in dealing with these business models is from a competitiveness perspective the editors of this book avoid it as the approach seems reductive of what the organizations are required to be aware of and cope with in the modern world only to their organizational ecosystems The book offers a compilation of studies on dynamic capabilities covering both cognitive and non cognitive DCs according to the managerial and leadership aspects of technological capabilities Each chapter obeys a certain order within a particular category of DCs and their reading along the book is telling a story showing seminal DCs that a company cannot neglect in the current world Their grouping also is structured in one way that one might be a preparatory reading for another Researchers working on the dynamic capabilities approach will particularly benefit from the discussions provided within this book
