

Medical Surgical Nursing 10th Edition Ignatavicius Workman **Test Bank**

Chapter 01: Overview of Professional Nursing Concepts for Medical-Surgical Nursing Ignatavicius: Medical-Surgical Nursing, 10th Edition

MULTIPLE CHOICE

1. A new nurse is working with a preceptor on a medical-surgical unit. The preceptor advises the new nurse that which is the **priority** when working as a professional nurse?
 - a. Attending to holistic client needs
 - b. Ensuring client safety
 - c. Not making medication errors
 - d. Providing client-focused care

ANS: B

All actions are appropriate for the professional nurse. However, ensuring client safety is the priority. Health care errors have been widely reported for 25 years, many of which result in client injury, death, and increased health care costs. There are several national and international organizations that have either recommended or mandated safety initiatives. Every nurse has the responsibility to guard the client's safety. The other actions are important for quality nursing, but they are not as vital as providing safety. Not making medication errors does provide safety, but is too narrow in scope to be the best answer.

DIF: Understanding

TOP: Integrated Process: Nursing Process: Intervention

KEY: Client safety

MSC: Client Needs Category: Safe and Effective Care Environment: Safety and Infection Control

2. A nurse is orienting a new client and family to the medical-surgical unit. What information does the nurse provide to best help the client promote his or her own safety?
 - a. Encourage the client and family to be active partners.
 - b. Have the client monitor hand hygiene in caregivers.
 - c. Offer the family the opportunity to stay with the client.
 - d. Tell the client to always wear his or her armband.

ANS: A

Each action could be important for the client or family to perform. However, encouraging the client to be active in his or her health care as a safety partner is the most critical. The other actions are very limited in scope and do not provide the broad protection that being active and involved does.

DIF: Understanding

TOP: Integrated Process: Teaching/Learning

KEY: Client safety

MSC: Client Needs Category: Safe and Effective Care Environment: Safety and Infection Control

3. A nurse is caring for a postoperative client on the surgical unit. The client's blood pressure was 142/76 mm Hg 30 minutes ago, and now is 88/50 mm Hg. What action would the nurse take **first**?
 - a. Call the Rapid Response Team.
 - b. Document and continue to monitor.
 - c. Notify the primary health care provider.
 - d. Repeat the blood pressure in 15 minutes.
