Examination Grade 12 Life Science 2014 June:

Most Likely to Succeed Tony Wagner, Ted Dintersmith, 2015-08-18 An urgent call for the radical re imagining of American education so that we better equip students for the realities of the twenty first century

Life by Algorithms Catherine Besteman, Hugh Gusterson, 2019-05-23 Essays on the downsides dysfunctions and dangers of automated decision making An excellent survey of the algorithmically managed life Choice The phone systems that businesses use to screen calls The link between student standardized test scores and public schools access to resources The algorithms that regulate patient diagnoses and reimbursements to doctors The impenetrable corporate bureaucracy that can drive customers in need of help up the wall or drive them to suicide The storage sorting and analysis of massive amounts of information have enabled the automation of decision making at an unprecedented level Meanwhile computers have offered a model of cognition that increasingly shapes our approach to the world The proliferation of robo processes is the result as editors Catherine Besteman and Hugh Gusterson observe in this rich and wide ranging volume which features contributions from a distinguished cast of scholars in anthropology communications international studies and political science Though automatic processes are designed to be engines of rational systems the stories in Life by Algorithms reveal how they can in fact produce absurd inflexible or even dangerous outcomes Joining the call for algorithmic transparency the contributors bring exceptional sensitivity to everyday sociality into their critique to better understand how the perils of modern technology affect finance medicine education housing the workplace food production public space and emotions not as separate problems but as linked manifestations of a deeper defect in the fundamental ordering of our society The Machine Stops E M Forster s 1909 science fiction story tells the tale of a human society collapsing when the technology upon which it has become dependent fails Think of this volume as The Machine Starts a collection of unsettling ethnographic accounts of the rise of algorithmic governance A necessary and sobering call to arms Stefan Helmreich Massachusetts Institute of Technology Contributors include Catherine Besteman Alex Blanchette Robert W Gehl Hugh Gusterson Catherine Lutz Ann Lutz Fernandez Joseph Masco Sally Engle Merry Keesha M Middlemass Noelle Stout Susan J Terrio

Weird Olga Khazan, 2020-04-07 Learn why the concept of weird is being reclaimed and turned into a badge of honor used to show how being different culturally socially physically or mentally can be a person s greatest strength Most of us have at some point in our lives felt like an outsider sometimes considering ourselves too weird to fit in Growing up as a Russian immigrant in West Texas Olga Khazan always felt there was something different about her This feeling has permeated her life and as she embarked on a science writing career she realized there were psychological connections between this feeling of being an outsider and both her struggles and successes later in life She decided to reach out to other people who were unique in their environments to see if they had experienced similar feelings of alienation and if so to learn how they overcame them Weird is based on in person interviews with many of these individuals such as a woman who is professionally surrounded by men a liberal in a conservative area and a Muslim in

a predominantly Christian town In addition it provides actionable insights based on interviews with dozens of experts and a review of hundreds of scientific studies *Weird* explores why it is that we crave conformity how that affects people who are different and what they can do about it First the book dives into the history of social norms and why some people hew to them more strictly than others Next Khazan explores the causes behind and the consequences of social rejection She then reveals the hidden upsides to being weird as well as the strategies that people who are different might use in order to achieve success in a society that values normalcy Finally the book follows the trajectories of unique individuals who either decided to be among others just like them to stay weird or to dwell somewhere in between Combining Khazan's own story with those of others and with fascinating takeaways from cutting edge psychology research *Weird* reveals how successful individuals learned to embrace their weirdness using it to their advantage

Grading Justice Kristen C. Blinne, 2021-01-11 In *Grading Justice Teacher Activist Approaches to Assessment* new and seasoned teachers are invited to engage with socially just approaches of assessment including practices aimed at resisting and undoing grading and assessment altogether to create more democratic grading practices and policies foregrounding the transformative potential of communication within their courses The contributions in this collection encourage readers to consider not only how educators might assess social justice work in and beyond the classroom but also to imagine what a social justice approach to grading and assessment would mean for intervening into unjust modes of teaching and learning Educators wishing to explore critical modes of grading and assessment grounded in social justice will find this book a timely and relevant pedagogical guide for their teaching and scholarship

Educational Policy Goes to School Gilberto Conchas, Michael Gottfried, Briana Hinga, Leticia Oseguera, 2017-09-08 Educational policies explicitly implemented in order to reduce educational gaps and promote access and success for disenfranchised youth can backfire and often have the unintended result of widening those gaps In this interdisciplinary collection of case studies contributors examine cases of policy backfire when policies don't work have unintended consequences and when policies help Although policy reform is thought of as an effective way to improve schooling structures and to diminish the achievement gap many such attempts to reform the system do not adequately address the legacy of unequal policies and the historic and pervasive inequalities that persist in schools Exploring the roots of school inequality and examining often ignored negative policy outcomes contributors illuminate the causes and consequences of poor policymaking decisions and demonstrate how policies can backfire fail or have unintended success

Students of Color and the Achievement Gap Richard R. Valencia, 2015-03-05

Students of Color and the Achievement Gap is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino Latina students He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory an asset based perspective and a systemic inequality approach By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps Following each of these concerns Valencia provides a number of reform suggestions that can lead to systemic transformations of K 12 education

Students of Color and the Achievement Gap makes a persuasive and well documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political economic and cultural frameworks

The Importance of Being Little Erika Christakis, 2017-02-07

Christakis expertly weaves academic research personal experience and anecdotal evidence into her book a bracing and convincing case that early education has reached a point of crisis her book is a rare thing a serious work of research that also happens to be well written and personal engaging and important Washington Post What kids need from grown ups but aren t getting an impassioned plea for educators and parents to put down the worksheets and flash cards ditch the tired craft projects yes you Thanksgiving Handprint Turkey and exotic vocabulary lessons and double down on one simple word play NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child s eye view of the learning environment To a four year old watching bulldozers at a construction site or chasing butterflies in flight the world is awash with promise Little children come into the world hardwired to learn in virtually any setting and about any matter Yet in today s preschool and kindergarten classrooms learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child s intelligence while overtaxing the child s growing brain These mismatched expectations wreak havoc on the family parents fear that if they choose the wrong program their child won t get into the right college But Yale early childhood expert Erika Christakis says our fears are wildly misplaced Our anxiety about preparing and safeguarding our children s future seems to have reached a fever pitch at a time when ironically

science gives us more certainty than ever before that young children are exceptionally strong thinkers In her pathbreaking book Christakis explains what it s like to be a young child in America today in a world designed by and for adults where we have confused schooling with learning She offers real life solutions to real life issues with nuance and direction that takes us far beyond the usual prescriptions for fewer tests more play She looks at children s use of language their artistic expressions the way their imaginations grow and how they build deep emotional bonds to stretch the boundaries of their small worlds Rather than clutter their worlds with more and more stuff sometimes the wisest course for us is to learn how to get out of their way Christakis s message is energizing and reassuring young children are inherently powerful and they and their parents will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood revealing a place that s rich with possibility
