Classifying Triangles

Classify Triangles by Angles One way to classify a triangle is by the measures of its angles.

- If one of the angles of a triangle is an obtuse angle, then the triangle is an **obtuse triangle**.
- If one of the angles of a triangle is a right angle, then the triangle is a **right triangle**.
- If all three of the angles of a triangle are acute angles, then the triangle is an **acute triangle**.
- If all three angles of an acute triangle are congruent, then the triangle is an **equilateral triangle**.

Example

Classify each triangle.

All three angles are congruent, so all three angles have measure 60° . The triangle is an equilateral triangle.

The triangle has one angle that is obtuse. It is an obtuse triangle.

The triangle has one right angle. It is a right triangle.
