**Interactive Collaborative Learning** Michael E. Auer, David Guralnick, James Uhomoibhi, 2016-12-31 This book presents the proceedings of the 19th International Conference on Interactive Collaborative Learning held 21-23 September 2016 at Clayton Hotel in Belfast UK. We are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of developments in both technology and the global markets, and the growing need for flexibility and agility are essential and challenging elements of this process that have to be addressed in general but especially in the context of engineering education. To face these topical and very real challenges, higher education is called upon to find innovative responses. Since being founded in 1998, this conference has consistently been devoted to finding new approaches to learning with a focus on collaborative learning. Today, the ICL conferences have established themselves as a vital forum for the exchange of information on key trends and findings and of practical lessons learned while developing and testing elements of new technologies and pedagogies in learning.

**Electrocardiographic Imaging** Maria S. Guillem, Carlos Figuera, Linwei Wang, 2020-04-17 Electrical activity in the myocardium coordinates the contraction of the heart and its knowledge could lead to a better understanding diagnosis and treatment of cardiac diseases This electrical activity generates an electromagnetic field that propagates outside the heart and reaches the human torso surface where it can be easily measured Classical electrocardiography aims to interpret the 12 lead electrocardiogram ECG to determine

cardiac activity and support the diagnosis of cardiac pathologies such as arrhythmias altered activations and ischemia More recently a higher number of leads is used to reconstruct a more detailed quantitative description of the electrical activity in the heart by solving the so called inverse problem of electrocardiography This technique is known as ECG imaging Today clinical applications of ECG imaging are showing promising results in guiding a variety of electrophysiological interventions such as catheter ablation of atrial fibrillation and ventricular tachycardia However in order to promote the adoption of ECG imaging in the routine clinical practice further research is required regarding more accurate mathematical methods further scientific validation under different preclinical scenarios and a more extensive clinical validation

Research Anthology on Computational Thinking, Programming, and Robotics in the Classroom Management Association, Information Resources, 2021-07-16 The education system is constantly growing and developing as more ways to teach and learn are implemented into the classroom Recently there has been a growing interest in teaching computational thinking with schools all over the world introducing it to the curriculum due to its ability to allow students to become proficient at problem solving using logic an essential life skill In order to provide the best education possible it is imperative that computational thinking strategies along with programming skills and the use of robotics in the classroom be implemented in order for students to achieve maximum thought processing skills and computer competencies The Research Anthology on Computational Thinking Programming and Robotics in the Classroom is an all encompassing reference book that discusses how computational thinking programming and robotics can be used in education as well as the benefits and difficulties of implementing these elements into the classroom The book includes strategies for preparing educators to teach computational thinking in the classroom as well as design techniques for incorporating these practices into various levels of school curriculum and within a variety of subjects Covering topics ranging from decomposition to robot learning this book is ideal for educators computer scientists administrators academicians students and anyone interested in learning more about how computational thinking programming and robotics can change the current education system
