Unit 6: Similarity Performance Tasks

Instructions: Choose one performance task. Write all your work on a separate clean piece of paper and attach it to this page.

Big Idea: Visualization, Reasoning and Proof, and Similarity

You can show that two triangles are similar when certain relationships exist between two or three pairs of corresponding parts. If you know two triangles are similar, then you know their corresponding sides are proportional.

Performance Task 1

In the diagram below, $\overline{AC} \parallel \overline{DF} \parallel \overline{BH}$ and $\overline{CB} \parallel \overline{FE}$.

- Find four similar triangles. Explain how you know that they are similar.
- Using the similar triangles you found in part (a), complete the following extended proportion:

$$\frac{AB}{AC} = \frac{DE}{?} = \frac{?}{DG} = \frac{?}{?}$$

Big Idea: Similarity

Lines with special relationships to the sides and angles of a triangle determine proportional segments. When you know the lengths of some of the segments, you can use a proportion to find an unknown length.

International Handbook of Metacognition and Learning Technologies Roger Azevedo, Vincent Aleven, 2013-04-23 Education in today's technologically advanced environments makes complex cognitive demands on students pre learning during and post learning Not surprisingly these analytical learning processes metacognitive processes have become an important focus of study as new learning technologies are assessed for effectiveness in this area Rich in theoretical models and empirical data the International Handbook of Metacognition and Learning Technologies synthesizes current research on this critical topic This interdisciplinary reference delves deeply into component processes of self regulated learning SRL examining theories and models of metacognition empirical issues in the study of SRL and the expanding role of educational technologies in helping students learn Innovations in multimedia hypermedia microworlds and other platforms are detailed across the domains so that readers in diverse fields can evaluate the theories data collection methods and conclusions And for the frontline instructor contributors offer proven strategies for using technologies to benefit students at all levels For each technology covered the Handbook Explains how the technology fosters students metacognitive or self regulated learning Identifies features designed to study or support metacognitive SRL behaviors Reviews how its specific theory or model addresses learners metacognitive SRL processes Provides detailed findings on its effectiveness toward learning Discusses its implications for the design of metacognitive tools Examines any theoretical instructional or other challenges These leading edge perspectives make the International Handbook of Metacognition and Learning Technologies a resource of great interest to professionals and researchers in science and math education classroom teachers human resource researchers and industrial and other instructors

Techniques for Monitoring Structural Behaviour of Pipeline Systems Christopher Reed, Alastair J. Robinson, David Smart, 2004 This project did a thorough review of the potential techniques which could monitor the structural performance of operationally critical mains those 30 or 760mm in diameter and larger of potable water distribution systems The objective was to increase effective pipeline management as it relates to predictive failure

Parameters studied were global local and environmental monitoring and the technologies studies were continuous remote and in pipe sensing Gathering data from range of different sensors aircraft satellites within and on pipes proved the most optimal with the understanding that further study of newer methods is recommended *Houghton Mifflin Math Central: Student text* ,1998 **Parametric Modeling With Solidworks 2010** Randy H.
