Committee on Oversight and Government Reform,2009 **A Dream Foreclosed** Laura Gottesdiener,2013 A moving exploration of homeownership freedom and the American Dream in light of the ongoing financial crisis and mass foreclosure

Foreclosed Daniel Immergluck,2011-02-11 Over the last two years the United States has observed with some horror the explosion and collapse of entire segments of the housing market especially those driven by subprime and alternative or exotic home mortgage lending The unfortunately timely Foreclosed explains the rise of high risk lending and why these newer types of loans and their associated regulatory infrastructure failed in substantial ways Dan Immergluck narrates the boom in subprime and exotic loans recounting how financial innovations and deregulation facilitated excessive risk taking and how these loans have harmed different populations and communities Immergluck who has been working researching and writing on issues tied to housing finance and neighborhood change for almost twenty years has an intimate knowledge of the promotion of homeownership and the history of mortgages in the United States The changes to the mortgage market over the past fifteen years including the securitization of mortgages and the failure of regulators to maintain control over a much riskier array of mortgage products led he finds inexorably to the current crisis After describing the development of generally stable and risk limiting mortgage markets throughout much of the twentieth century Foreclosed details how federal policy makers failed to regulate the new high risk lending markets that arose in the late 1990s and early 2000s The book also examines federal state and local efforts to deal with the mortgage and foreclosure crisis of 2007 and 2008 Immergluck draws upon his wealth of experience to provide an overarching set of principles and a detailed set of policy recommendations for righting the ship of U S housing finance in ways that will promote affordable yet sustainable homeownership as an option for a broad set of households and communities

The Politics of Voter Suppression Tova Wang,2012-08-15 The Politics of Voter Suppression arrives in time to assess actual practices at the polls this fall and to reengage with debates about voter suppression tactics such as requiring specific forms of identification Tova Andrea Wang examines the history of how U S election reforms have been manipulated for partisan advantage and establishes a new framework for analyzing current laws and policies The tactics that have been employed to suppress voting in recent elections are not novel she finds but rather build upon the strategies used by a variety of actors going back nearly a century and a half This continuity along with the shift to a Republican domination of voter suppression efforts for the past fifty years should inform what we think about reform policy today Wang argues that activities that suppress voting are almost always illegitimate while reforms that increase participation are nearly always legitimate In short use and abuse of election laws and policies to suppress votes has

obvious detrimental impacts on democracy itself Such activities are also harmful because of their direct impacts on actual election outcomes Wang regards as beneficial any legal effort to increase the number of Americans involved in the electoral system This includes efforts that are focused on improving voter turnout among certain populations typically regarded as supporting one party as long as the methods and means for boosting participation are open to all Wang identifies and describes a number of specific legitimate and positive reforms that will increase voter turnout

Predatory Lending and the Destruction of the African-American Dream Janis Sarra, Cheryl L. Wade, 2020-07-09 Since the Great Recession of 2008 the racial wealth gap between black and white Americans has continued to widen In *Predatory Lending and the Destruction of the African American Dream* Janis Sarra and Cheryl Wade detail the reasons for this failure by analyzing the economic exploitation of African Americans with a focus on predatory practices in the home mortgage context They also examine the failure of reform and litigation efforts ostensibly aimed at addressing this form of racial discrimination This research augmented by first hand narratives provides invaluable insight into the racial wealth gap by vividly illustrating the predation that targets African American consumers and examining the intentionally obfuscating settlement terms of cases brought by the U S Department of Justice states attorneys and municipalities The authors conclude by offering structural systemic changes to address predatory practices This important work should be read by anyone seeking to understand racial inequality in the United States
