**Tamils, Social Capital and Educational Marginalization in Singapore** Lavanya Balachandran, 2021-07-29 Labouring to Learn examines academic mobility pathways among ethnic minority Tamil youths in public secondary schools and vocational institutions in Singapore This book qualitatively examines the interactive effects of race and class on the educational performance of these youths through the lens of social capital Despite their numerical majoritarian position within the Indian population in Singapore the foreclosed access for Tamils to diverse class networks within the ethnic community as well as limited inter ethnic interactions has historically truncated the means to resources and opportunities for social mobility In schools the narratives shared by Tamil boys and girls from the lower academic streams and economically disadvantaged backgrounds reveal that they typically experience exclusion on account of racial economic and academic marginalisation in their everyday lives Turning to bonding ties among peers and family members provides social support resources that offer some respite from marginalisation On the flipside articulations of resistance ensue among Tamil youths that tangibly take time away from learning and run the danger of strengthening the cultural deficit rhetoric for mainstream society to explain the poor academic performance among ethnic minorities This account of educational marginalisation amongst Singaporean Tamil youths contributes towards understanding social inequality in a non liberal

multicultural context where marginalisation is differentially experienced across ethnic minority groups and traced to broader socio historical contexts of migration assimilation and minority majority relations Furthermore it also articulates the utility of a social capital framework in historically revealing how educational inequality emerged and continues to be sustained in a postcolonial context Governance for Harmony in Asia and Beyond Julia Tao,Anthony B. L. Cheung,Martin Painter,Chenyang Li,2009-12-18 Harmony has become a major challenge for modern governance in the twenty first century because of the multi religious multi racial and multi ethnic character of our increasingly globalized societies Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies This book examines the idea of harmony and its place in politics and governance both in theory and practice in Asia the West and elsewhere It explores and analyses the meanings mechanisms dimensions and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions The book argues that in Western political thought which sees politics as primarily concerned with resolving social conflicts and protecting individual rights the concept of harmony has often been neglected In contrast since earliest times harmony or he has been a profound theme in Confucian thought and current leaders of many East Asian governments and the Chinese government have explicitly declared that the realisation of a harmonious society is their aim The book also assesses how harmony is pursued jeopardized or deformed in the real world of politics based upon empirical analysis of a variety of different cultural social and political contexts including China Hong Kong Singapore Malaysia Singapore Vietnam Denmark Latin America and the Scandinavian countries It shows how harmony as an organizing concept can help to promote new thinking in governance and overcome problems of modern day governance like distrust adversarial conflicts hyper individualism coercive state intervention and free market alienation It also discusses the potential problems posed by the pursuit of harmony in particular in the grave threat of totalitarianism and considers how these risks could best be mitigated **Australian Economic Papers** ,1976

**Solved Papers** Exam Leaders Team, China's Economic Development Lee Pei May, 2024-06-21 Through a rigorous examination of China s rise Lee addresses an important question Did China catch up Or more specifically can growth be

automatically translated to catching up with the advanced industrialised countries or has it only allowed limited progress if any to be made To answer these queries and the broader question of the possibility of the Global South converging with the Global North four development theories are utilised with competing explanations to uncover the complexity and multifaceted development of China This includes whether China really has a unique developmental model to offer Positioning China within the global economy this book traces its developmental progress over time as well as its progress relative to other countries To understand whether the Chinese political economy is socialist or not Lee moves away from the orthodox definition of socialism and instead examines the official narrative of Socialism with Chinese Characteristics Lastly this book argues that though China is catching up challenges that could potentially block China s progress for a full catch up are to be anticipated A useful resource for students and scholars in the fields of international relations international political economy Chinese studies and development studies     **Monthly List** ,1934
