*Cancer, Radiation Therapy, and the Market* Barbara Bridgman Perkins, 2017-08-16 Appraising cancer as a major medical market in the 2010s Wall Street investors placed their bets on single technology treatment facilities costing 100 300 million each Critics inside medicine called the widely publicized proton center boom crazy medicine and unsustainable public policy There was no valid evidence they claimed that proton beams were more effective than less costly alternatives But developers expected insurance to cover their centers staggeringly high costs and debts Was speculation like this new to health care Cancer Radiation Therapy and the Market shows how the radiation therapy specialty in the United States later called radiation oncology coevolved with its device industry throughout the twentieth century Academic engineers and physicians acquired financing to develop increasingly powerful radiation devices initiated companies to manufacture the devices competitively and designed hospital and freestanding procedure units to utilize them In the process they incorporated market strategies into medical organization and practice Although palliative benefits and striking tumor reductions fueled hopes of curing cancer scientific research all too often found serious patient harm and disappointing beneficial impact on cancer survival This thoroughly documented and provocative inquiry concludes that public health policy needs to re evaluate market driven high tech medicine and build evidence based health care systems **Canadian Journal of Physics** ,2013

*Discovering the Other* Cameron Harder, 2013-05-06 What is God's mission? Simply put, says theologian and field educator Cameron Harder, God's mission is to form communities that reflect and embody the life of the Trinity. *Discovering the Other* is an introduction to two tools that community builders have found helpful: appreciative inquiry and asset mapping. These tools help congregations see that all of life is saturated by the sacred and give them energy to begin living as if it were so. Instead of asking "What's wrong?" appreciative inquiry asks "What's right?" Asset mapping asks "What resources do you have personally that we could bring to our future together?" Out of these questions can arise a sense that every congregation is rich in history, people, and resources. Ideas emerge as people inspired by the Spirit listen and talk to each other. The leader's task is to facilitate, coalesce, and connect ideas to catalyze and stimulate the development of vision. The creative connections lead to programs and projects that will enrich your congregation's mission. But most importantly, in the process, they will engage you with others with their stories, their hopes, their gifts to build community. This book looks for God not only through the lens of such tools but in the tools themselves. It is an effort to understand how processes like appreciative inquiry and asset mapping reflect the character and community-building style of the God whom Christians worship as Divine community.      **Journal of Developmental Education**, 2015      CERN Courier, 2013
