promoting economic growth and shared prosperity Sri Lanka has enjoyed high school attainment and enrollment rates for several decades However it still faces major challenges in the education sector and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper middle income country The authors of Sri Lanka Education Sector Assessment Achievements Challenges and Policy Options offer a thorough review of Sri Lanka's education sector from early childhood education through higher education With this book they attempt to answer three questions How is Sri Lanka's education system performing especially with respect to participation rates learning outcomes and labor market outcomes How can the country address the challenges at each stage of the education process taking into account both country and international experience and also best practices Which policy actions should Sri Lanka make a priority for the short and medium term The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them To attain inclusive growth and become globally competitive Sri Lanka needs to embark on integrated reforms across all levels of education These reforms must address both short term skill shortages and long term productivity As Sri Lanka moves up the development ladder the priorities of primary secondary and postsecondary education must be aligned to meet the increasingly complex education and skill requirements Resources in Education ,1989

Food and Cooking Skills Education Anita Tull, 2018-01-29 Food and Cooking Skills Education FCSE is a complex mix of policy and practicality educational theory and pedagogy classroom and government policy This book shows how FCSE has been at the centre of a tussle between education and policy for decades It reviews how FCSE has grappled with various significant issues of concern that threaten to marginalise it and pose problems for educational practicalities as expectations are increased but resources are squeezed It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready made food has become commonplace and public knowledge of where our food comes from is noticeably lacking This has contributed to the escalating incidence of diet related diseases and the attendant cost to society and threatened environmental sustainability In turn governments have reacted by proposals to make practical cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs Based on detailed research conducted across England and Wales as well as comparisons with thirty five other countries or states the author makes recommendations for policy to manage this challenge facing contemporary society
