Guskey,2014-08-05 Create and sustain a learning environment where students thrive and stakeholders are accurately informed of student progress Clarify the purpose of grades craft a vision statement aligned with this purpose and discover research based strategies to implement effective grading and reporting practices Identify policies and practices that render grading inaccurate and understand the role grades play in students future success and opportunities *Achieving Regulatory Excellence* Cary Coglianese,2016-12-20 Whether striving to protect citizens from financial risks climate change inadequate health care or the uncertainties of the emerging sharing economy regulators must routinely make difficult judgment calls in an effort to meet the conflicting demands that society places on them Operating within a political climate of competing demands regulators need a lodestar to help them define and evaluate success *Achieving Regulatory Excellence* provides that direction by offering new insights from law public administration political science sociology and policy sciences on what regulators need to do to improve their performance *Achieving Regulatory Excellence* offers guidance from leading international experts about how regulators can set appropriate priorities and make sound evidence based decisions through processes that are transparent and participatory With increasing demands for smarter but leaner government the need for sound regulatory capacity for regulatory excellence has never been stronger **The Annalist** ,1915 *Rankings and the Reshaping of Higher Education* Ellen Hazelkorn,2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars **Higher Expectations** Derek Bok,2022-05-17 How our colleges and universities can respond to the changing hopes and needs of society In recent decades cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society In this landmark book Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty first century Prior to this century most psychologists thought that creativity empathy resilience conscientiousness and most personality traits were largely fixed by early childhood What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life

How prepared are educators to cultivate these qualities of mind and behavior What do they need to learn to capitalize on the possibilities Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods What can be done to hasten the process of innovation and application In providing answers to these questions Bok identifies the hurdles to institutional change proposes sensible reforms and demonstrates how our colleges can help students lead more successful productive and meaningful lives
