The Language Issue in the Teaching of Mathematics in South Africa Lindiwe Tshuma, 2021-01-26 The book is the result of a five year project that culminated within the first three years in doctoral research interrogating language competency for meaningful mathematics instruction at upper primary level conducted at University of Stellenbosch in 2017 and this book in the succeeding two years The initial research project received countrywide coverage in several South African media outlets including Times Live and Radio 2000

The Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-08-24 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations All over the world economic inclusion has risen to the top of the development discourse A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education Using the vivid example of South Africa a country that had ambitious goals at the outset of its transition from apartheid to democracy it explores how the interaction of politics and institutions affects educational outcomes By examining lessons learned from how South Africa failed to achieve many of its goals it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re orient the system towards learning

Improving National Education Systems After COVID-19 Nuno Crato, Harry Anthony Patrinos, 2024-10-14 This open access book compares and analyses the results in twelve countries of the two latest international student assessments Progress in International Reading Literacy Study 2021 PIRLS and the Programme for International Student Assessment 2022 PISA and tries to disentangle the effects of the pandemic from the long term trends in education It is one of the first or maybe the first published volumes to provide a global assessment of the devastating impact of the COVID 19 pandemic on student learning as measured by independent international comparative surveys The 12 countries discussed in this volume represent a wide variety of educational systems including Chile Ecuador England Estonia Italy the Netherlands Poland Portugal South Africa Spain and the United States It compiles diverse scenarios including countries that are high performers countries that perform at the OECD mean and countries that are struggling to attain the OECD average Each country has its history that reflects efforts to cope with pandemic school closures and to improve educational achievement A major topic discussed in this edited volume is related to understanding the diverse circumstances for the variations in results within different countries Why did learning loss in specific locations How much learning was lost Why is a country continuously declining Why is another country constantly improving Why is there higher or less levels of inequality How is a country regularly improving with an outdated curriculum

Which policies have worked and which ones have not What can we do now This book is a valuable contribution to answer these concerns based on a diverse sample of countries and research questions *Mathematics and Science Achievement at South African Schools in TIMSS 2003* Vijay Reddy,2006 This monograph reports on South Africa s performance in TIMSS 2003 relative to 50 other countries describes the performance of different groups of learners in South Africa and provides contextual information about teachers schools and the curriculum The report concludes with recommendations for strategic interventions to improve South African learners performance in mathematics and science The findings contained in this report offer valuable insights to academics policymakers curriculum planners and teachers and those involved in the development of education in South Africa *Radical Solutions for Education in Africa* Daniel Burgos,Jako Olivier,2021-08-02 This book explores the state of open education in terms of self directed learning on the African continent Through a combination of conceptual systematic literature review and empirical chapters readers will get a research based impression of these aspects in this area Apart from presenting existing wider trends regarding open education this book also reports on effective open practices in support of self directed learning **South Africa** Sue Bradford Edwards,2025-08-01 South Africa highlights major destinations within the country and the people who shape the nation s culture Readers will learn about the geography wildlife history people and economy of South Africa gaining an understanding of what life looks like in the country today Features include a glossary a map references websites source notes and an index Aligned to Common Core Standards and correlated to state standards Essential Library is an imprint of Abdo Publishing a division of ABDO *Researching Mathematics Education in South Africa* Renuka Vithal,Jill Adler,Christine Keitel,2005 Reflecting on the theoretical and ideological work that has contributed to the growth of mathematics education research in South Africa this study provides a historical analysis of forces that have changed and shaped mathematics curricula over the years The themes researched and explored include radical pedagogy progressive classroom practices ethnomathematics and South African mathematics education research within both its local and international contexts **Annual Report** South Africa. Department of Basic Education,2016 **South African Schooling: The Enigma of Inequality** Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case

that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Self-directed learning research and its impact on educational practice Elsa Mentz,Roxanne Bailey,2021-05-17 This scholarly book is the third volume in an NWU book series on self directed learning and is devoted to self directed learning research and its impact on educational practice The importance of self directed learning for learners in the 21st century to equip themselves with the necessary skills to take responsibility for their own learning for life cannot be over emphasised The target audience does not only consist of scholars in the field of self directed learning in Higher Education and the Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors The book contributes to the discourse on creating dispositions towards self directed learning among all learners and adds to the latest body of scholarship in terms of self directed learning Although from different perspectives all chapters in the book are closely linked together around self directed learning as a central theme following on the work done in Volume 1 of this series Self Directed Learning for the 21st Century Implications for Higher Education to form a rich knowledge bank of work on self directed learning
