Practical 1: Dissection of a sheep heart

Heart Dissection Walk Through :

The heart dissection is probably one of the most difficult dissections you will do. Part of the reason it is so difficult to learn is that the heart is not perfectly symmetrical, but it is so close that it becomes difficult to discern which side you are looking at (dorsal, ventral, left or right). Finding the vessels is directly related to being able to orient the heart correctly and figuring out which side you are looking at.

The heart is also difficult because the fatty tissue that surrounds the heart can obscure the openings to the vessels. This means that you really must experience the heart with your hands and feel your way to find the openings. Many people will be squeamish about this, and because the heart is slippery, it is easy to drop. Don't be shy with the heart; use your fingers to feel your way through the dissection.

1. Step One: Orientation

When you first remove your heart from the bag, you will see a lot of fatty tissue surrounding it. It is usually a waste of time to try to remove this tissue. You may also want to arm yourself with some kind of markers for the parts you find, colour pencils work great to identify a vessel and you will see many used to mark openings on the heart.

There are a few clues to help you figure out the left and the right side, but often the packaging and preserving process can cause the heart to be misshapen. If you are lucky, the heart will be nicely preserved and you will see that the front (ventral) side of the heart has a couple of key features:

- 1) a large **pulmonary trunk(artery)** that extends off the top of it
- 2) the flaps of the **auricles** covering the top of the **atria**.
- 3) the **curve** of the entire **front side**, whereas the **backside** is much **flatter**.

Answers to Your Biggest Questions About Teaching Secondary Science
Karen Mesmer, Enya Granados, Kevin Gant, Laura Shafer, Ayanna D. Perry, 2024-01-16. Your guide to grow and flourish as a science teacher. The past two decades have seen a paradigm shift in science education thanks in large part to the Next Generation Science Standards (NGSS) which advocate a move away from procedural lab investigations and direct instruction and toward increased emphasis on reasoning, sensemaking, phenomena exploration, problem solving and collaboration. Under this new paradigm, students are learning real science as scientists practice it so that more and more students are actively investigating questions and pursuing solutions of their own making. As part of the Five to Thrive series for early career educators, this comprehensive guide provides those who are new to teaching science as well as seasoned teachers looking to enhance their practice the fundamentals to develop best teaching practices that reflect their students' experiences and requirements. Written by experienced science educators, Answers to Your Biggest Questions About Teaching Secondary Science provides practical guidance on successful strategies and techniques for teaching science in a way that gives every student the opportunity to learn, grow and achieve at high levels while providing opportunities to develop their agency and authority in the classroom, ultimately resulting in a positive science identity. The book is organized around five overarching questions and answers that will help you most thrive in your secondary science classroom: How do I build a positive science community? How do I structure, organize and manage my science class? How do I engage my students in science? How do I help my students talk about science? How do I know what my students know and how can I use that information to plan and move them forward? The book concludes with a sixth question: Where do I go from here that provides guidance for growing your

practice over time including discussions on self care advocating for students and an extensive discussion on growing your professional network Woven throughout you ll find helpful sidebar notes on fostering identity and agency access and equity teaching in different settings and invaluable resources for deeper learning Strive to become the best science educator you can be your students are counting on it *Grading Visible Learners* Dave Nagel,Bruce Potter,2025-03-06 Transform your grading and assessment practices into powerful tools for student success When we implement a grading system that prioritizes completion and compliance and penalizes students who take risks we disrupt the learning journey not further it It s time to align how we grade with what we know from research works best and help move learning forward for all students Grading Visible Learners provides educators with practical solutions for improving grading approaches actions and practices as well as concrete tools and strategies teachers and collaborative teams can adapt and use in their classrooms and schools right away Inside you ll find Traits to promote in students so they can drive their own learning Examples of grading and feedback actions that foster assessment capability in students Tools templates and work samples to help you improve your grading practices Guidance on how to promote goal setting as well as help teachers and students view grades as feedback rather than an ending point in the learning journey Multiple ways for students to show growth and progress In this hands on guidebook you will discover how to best impact learning and ensure that grading serves as a constructive tool and conduit to maximizing impact on student learning rather than a hindrance to student success *The Use of Dispersants in Marine Oil Spill Response* National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Ocean Studies Board,Committee on the Evaluation of the Use of Chemical Dispersants in Oil Spill Response,2020-05-24 Whether the result of an oil well blowout vessel collision or grounding leaking pipeline or other incident at sea each marine oil spill will present unique circumstances and challenges The oil type and properties location time of year duration of spill water depth environmental conditions affected biomes potential human community impact and available resources may vary significantly Also each spill may be governed by policy guidelines such as those set forth in the National Response Plan Regional Response Plans or Area Contingency Plans To respond effectively to the specific conditions presented during an oil spill spill responders have used a variety of response options including mechanical recovery of oil using skimmers and booms in situ burning of oil monitored natural attenuation of oil and dispersion of oil by chemical dispersants Because each response method has advantages and disadvantages it is important to understand specific scenarios where a net benefit may be achieved by using a particular tool or combination of tools This report builds on two previous National Research Council reports on dispersant use to provide a current understanding of the state of science and to inform future marine oil spill response operations The response to the 2010 Deepwater Horizon spill included an unprecedented use of dispersants via both surface application and subsea injection The magnitude of the spill stimulated interest and funding for research on oil spill response and dispersant use in particular This study assesses the effects and

efficacy of dispersants as an oil spill response tool and evaluates trade offs associated with dispersant use *Decision Making in a World of Comparative Effectiveness Research* Howard G.
