

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

The administration of examinations for 15-19 year olds in England Great Britain: Parliament: House of Commons: Education Committee, 2012-07-03 This report from the Education Committee looks at the administration of examinations for 15 19 year olds in England The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated The Committee considers a number of options to change incentives including i A single board This offers a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii Franchising of subjects to exam boards This removes syllabus competition but again has downsides 3 Or the current system of multiple boards The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges The Committee also recommends the development of national syllabuses accredited by Ofqual The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate

West,2013-07-15 Nearly a century ago famed educator John Dewey said that if we teach today s students as we taught yesterday s we rob them of tomorrow That wisdom resonates more strongly than ever today and that maxim underlies this insightful look at the present and future of education in the digital age As Darrell West makes clear today s educational institutions must reinvent themselves to engage students successfully and provide them with the skills needed to compete in an increasingly global technological and online world Otherwise the American education system will continue to fall woefully short in its mission to prepare the population to survive and thrive in a rapidly changing world West examines new models of education made possible by enhanced information technology new approaches that will make public education in the post industrial age more relevant efficient and ultimately more productive Innovative pilot programs are popping up all over the nation experimenting with different forms of organization and delivery systems Digital Schools surveys this promising new landscape examining in particular personalized learning realtime student assessment ways to enhance teacher evaluation the untapped potential of distance learning and the ways in which technology can improve the effectiveness of special education and foreign language instruction West illustrates the potential contributions of blogs wikis social media and video games and augmented reality in K 12 and higher education Technology by itself will not remake education But if today s schools combine increased digitization with needed improvements in organization operations and culture we can overcome current barriers produce better results and improve the manner in which schools function And we can get back to teaching for tomorrow rather than for yesterday **Ancient and Indigenous Wisdom Traditions in the Americas** Ehaab

Respect for Teachers Brian Ford,2012-12-27 For over 30 years we have been in the midst of a paradox Following a questionable logic that sees education as a means to economic ends efforts to reform education have focused on keeping the US from slipping in international economic competition Relying on testing as a standard in the end we may have decreased our human potential and become less competitive Our system has gotten worse at its core in its philosophical tenets and in its ultimate effects by placing unwonted pressure on our youth and in stifling their creativity While this goes back decades Respect for Teachers takes its title from a phrase perhaps a codeword in President s 2011 State of the Union address and sits down to consider its implications Connecting attacks on teachers unions and schools and the misrepresentation of research to the promotion of new economic models in education it suggests that the Obama administration may be without quite realizing it setting the stage for rapid privatization of the public system As this endangers the egalitarian basis of democracy it also reminds us that schooling is big business many trillions of dollars world wide Joseph Schumpeter once said No bourgeoisie ever disliked war profits Respect operates under the premise that no bourgeoisie ever disliked the spoils of school reform either
