aspects of LCE and attempt to integrate both market based and technology based solutions into a comprehensive strategy to creating a roadmap for LCE in Asia This book is an essential reading for economists policy makers practitioners engineers and researchers concerned with climate change energy production and development in Asia and the impacts and potential for the world **World Development Report 2010** World Bank,2009-11-06 In the crowded field of climate change reports WDR 2010 uniquely emphasizes development takes an integrated look at adaptation and mitigation highlights opportunities in the changing competitive landscape and proposes policy solutions grounded in analytic work and in the context of the political economy of reform *IDIHOM: Industrialization of High-Order Methods - A Top-Down Approach* Norbert Kroll,Charles Hirsch,Francesco Bassi,Craig Johnston,Koen Hillewaert,2015-01-02 The book describes the main findings of the EU funded project IDIHOM Industrialization of High Order Methods A Top Down Approach The goal of this project was the improvement utilization and demonstration of innovative higher order simulation capabilities for large scale aerodynamic application challenges in the aircraft industry The IDIHOM consortium consisted of 21 organizations including aircraft manufacturers software vendors as well as the major European research establishments and several universities all of them with proven expertise in the field of computational fluid dynamics After a general introduction to the project the book reports on new approaches for curved boundary grid generation high order solution methods and visualization techniques It summarizes the achievements weaknesses and perspectives of the new simulation capabilities developed by the project partners for various industrial applications and includes internal and external aerodynamic as well as multidisciplinary test cases **Sharing a Future in Asia** ,2007 *Hospitality, Travel, and Tourism: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2014-10-31 Over generations human society has woven a rich tapestry of culture art architecture and history personified in artifacts monuments and landmarks arrayed across the globe Individual communities are looking to exploit these local treasures for the benefit of the travelers who come to see them Hospitality Travel and Tourism Concepts Methodologies Tools and Applications considers the effect of cultural heritage and destinations of interest on the global economy from the viewpoints of both visitor and host This broadly focused multi volume reference will provide unique insights for travelers business leaders sightseers cultural preservationists and others interested in the unique variety of human ingenuity and innovation around the world **The United States Catalog** Mary Burnham,Carol Hurd,1928 **Subsurface Solute Transport Models and Case Histories** Vyacheslav G. Rumynin,2012-01-14 The book addresses the development of the basic knowledge of the subsurface solute transfer with a particular emphasis on field data collection and analysis coupled with modeling analytical and numerical tool application The relevant theoretical developments are concerned mainly with the formulation and solution of deterministic mass transport equations for a wide range of engineering issues in groundwater quality assessment and forecasting The book gives many computational examples and case studies drawn from the conducted field investigations The analyzed problems are as

follows investigation and prediction of groundwater contamination by industrial contaminants and solutions radionuclides chloride and nitrate brine with special focus on the effect of a aquifer heterogeneity anisotropy and dual porosity b density contrast existing between industrial waste and groundwater or in density stratified artesian and coastal groundwater systems c physicochemical interactions that play a major role in retarding e g adsorption or enhancing e g interactions between dissolved species and mobile colloids contaminant transport prediction of the effects of pumping on groundwater quality at wellfields groundwater dating using stable and radioactive isotopes for prediction and assessment of contamination potential field and laboratory tests design and analysis and monitoring data interpretation partitioning of surface and subsurface flows using isotope techniques One of the most essential topics addressed in the book is the migration and fate of radionuclides Model development is motivated by field data analysis from a number of radioactively contaminated sites in the Russian Federation near surface radioactive waste disposal sites and deep well radioactive waste injection sites They play a unique role in the advancement of knowledge of the subsurface behavior and fate of many hazardous radionuclides and can be considered as field scale laboratories Thus the book along with theoretical findings contains field information which will facilitate the understanding of subsurface solute transport and the development of a methodology for practical applications to groundwater hydrology
