Using participant observations and interviews it examines each phase of the development of midwifery in depth Providing a systematic study of the existing literature and contemporary national health policies it analyses the factors contributing to the current demise of midwifery in China such as the absence of national regulation high standards of education and national midwives associations Furthermore it argues that China s national statistics in the past six decades demonstrate clear evidence that minimising maternal mortality rates will only happen through wider availability of services rather than through obstetric technology or facility based care Ultimately therefore this book supports the view that humanity and midwifery will survive to overcome domination by both technology and market forces and that economic growth and medical technology alone will not be sufficient in providing effective healthcare This book is an indispensable resource for the study of Chinese midwifery both in theory and in practice As such it will be useful to students and scholars of Midwifery Women s Health Sociology and culture and society in China

String-Math 2011 Jonathan Block,2012 The nature of interactions between mathematicians and physicists has been thoroughly transformed in recent years String theory and quantum field theory have contributed a series of profound ideas that gave rise to entirely new mathematical fields and revitalized older ones The influence flows in both directions with mathematical techniques and ideas contributing crucially to major advances in string theory A large and rapidly growing number of both mathematicians and physicists are working at the string theoretic interface between the two academic fields The String Math conference series aims to bring together leading mathematicians and mathematically minded physicists working in this interface This volume contains the proceedings of the inaugural conference in this series String Math 2011 which was held June 6 11 2011 at the University of Pennsylvania

Water System Science and Policy Interfacing Philippe Quevauviller, 2010 Recent discussions among scientists and policy makers have highlighted that knowledge generated by many research and demonstration projects is not reaching policymakers in an efficient way Conversely the consideration of research results by the policy making community is not straightforward and difficulties arise in integrating the latest research developments in legislation The difficulty is enhanced by the fact that the policy making community is not defining its role as client sufficiently well and the dialogue and communication channels are far from ideal to ensure an efficient flow of information An increasing number of experts consider that improvements could be achieved through the development of a science policy interface so that R D results are synthesised in a way to efficiently feed policy implementation and that short medium and long term research needs may be identified This book examines the issue of integrating science into policy with an emphasis on water system knowledge and related policies An important feature of the book is the discussion of science policy interfacing needs illustrated by examples from authors from different countries in relation to water system management This publication is timely in that the science policy interfacing is now identified as a key challenge worldwide with regard to integrated water resource management and therefore the book will be of great interest to scientists water managers and stakeholders Readers will also benefit from a better understanding of the needs benefits and drawbacks of an established transfer mechanism of scientific outputs to policies
