This book, with its remarkable collection of essays from around the world, demonstrates how small local actions considered together can have a dramatic and far-reaching impact. Strategic Management in the Arts Lidia Varbanova, 2013-01-03. Strategic Management in the Arts looks at the unique characteristics of organisations in the arts and culture sector and shows readers how to tailor a strategic plan to help these diverse organisations meet their objectives. Strategic management is an essential element that drives an organisation's success, yet many cultural organizations have yet to apply strategic thinking and entrepreneurial actions within the management function. Varbanova reviews the existing theories and models of strategic management and then relates these specifically to cultural organisations. Also included are sections on entrepreneurship and innovations in the arts, considering the concept of a learning organisation, an organisation able to adapt its strategy within a constantly changing complex environment. The book is structured to walk the reader through each element of the strategic plan systematically. With a fresh approach, key questions, examples, international cases to connect theory with practice and suggestions for further reading, this book is designed to accompany classes on strategic planning, cultural management or arts management.

New Approach to Cultural Heritage Le Cheng, Jianping Yang, Jianming Cai, 2021-10-26. This book addresses questions about theories of heritage, its methodologies of research and where its boundaries lie with tourism, urban development, post-disaster recovery, collective identities, memory or conflict. This book is a collection of heritage studies from a critical perspective, as a product of the 2018 ACHS Association of Critical Heritage Studies Conference in Hangzhou, the largest conference of its kind in Asia. The contributors cover a wide spectrum of issues in heritage studies, such as heritage management, accessibility to heritage, heritage conservation and heritage policy and heritage representation. It also examines the various contexts within which heritage emerges and how heritage is constructed within that context. Analyses are based on not only representations of heritage but also on the performativity. Explorations touch upon community involvement, landscape, history, children's literature, endangered food, architecture, advertisement, allotment garden and gender and visual art. As heritage has always been a locus of contested verities, the book offers a variegated approach to heritage studies. It provides students and scholars new perspectives on heritage study.
