The Archaeologist's Manual for Conservation Bradley A. Rodgers, 2007-05-08 This is a Foreword by an archaeologist not a conservator but as Brad Rodgers says Conservation has been steadily pulled from archaeology by the forces of specialization p 3 and he wants to remedy that situation through this manual He sees this work as a call to action for the non professional conservator permitting curators conservators and archaeologists to identify artifacts that need professional attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using simple non toxic procedures p 5 It is the mission of Brad's manual to bring conservation back into archaeology p 6 The degree of success of that goal depends on the degree to which archaeologists pay attention to and put to use what Brad has to say because as he says The conservationist archaeologist is responsible to make preparation for an artifact's care even before it is excavated and after its storage into the foreseeable future a tremendous responsibility p 10 The manual is a combination of highly technical as well as common sense methods of conserving wood iron and other metals ceramics glass and stone organics and composites a far better guide to artifact conservation than was available to me when I first faced that archaeological challenge at colonial Brunswick Town North Carolina in 1958 a challenge still being faced by archaeologists today The stage of conservation in 1958 is in dramatic contrast to the procedures Brad describes in this manual conservation has indeed made great progress For instance a common procedure then was to heat the artifacts red hot in a furnace a method that made me cringe

Institutional Change for Museums Marianna Pegno, Kantara Souffrant, 2024-08-14. *Institutional Change for Museums: A Practical Guide to Creating Polyvocal Spaces* demonstrates how museums can enact institutional change by implementing systematic and structural approaches to anti-racist, anti-colonial and anti-elitist practices. This practical guide brings together museum and heritage experts, artists, organizers and cultural workers to present thoughtful polyvocal critiques and solutions for conceptualizing museums of the future. These authors embrace hybrid identities, complicate concepts of nationalism, straddle disciplines and extend the concept, function and literal place and definition of the museum. The book shows that museums must cultivate practices that center people, interrogate colonial legacies, take new approaches to curatorial ethics and caring for objects and imagine new strategies for asserting the relevance of museums to create institutional change. This resource challenges traditional approaches to museology by offering scholarly research and case studies alongside personal narratives and speculative fiction. *Institutional Change for Museums* will be an invaluable resource for museum professionals and cultural workers including curators, educators and researchers. It will also be beneficial to those studying or researching in Museum and Heritage Studies, Cultural Studies, Feminist Studies, Visual Culture, Social Justice and Postcolonial Studies.

Conservation Skills for the 21st Century Chris Caple, Emily Williams, 2023-05-12. *Conservation Skills for the 21st Century* provides a much needed update to the original *Conservation Skills* volume, presenting an overview of current issues facing conservators of historic and artistic works. Beginning with the basics, why the past is important as well as an overview of the nature and history of conservation, the book allows the reader to develop a holistic appreciation of the subject. As with the first edition, this volume assists with the development of judgement in conservation students and young professionals. A selection of new case studies representing issues conservators are likely to face in the 21st century illustrates the crucial considerations that must be made when proposing and executing a conservation treatment. Incorporating recent developments and use of new technologies in conservation processes, the book also covers topics such as conservation ethics, recording and documentation, investigating and cleaning objects, stabilisation and restoration values, decision making and responsibilities, preventive conservation approaches to the treatment of working and socially active objects, sustainability in conservation and the conservator's role as advocate. With detailed case studies and written in a clear, accessible style, *Conservation Skills for the 21st Century* remains essential reading for student conservators and conservation professionals around the globe working across a wide range of conservation disciplines.
