Anderson,2025-02-28 The common practice of ability grouped reading in UK schools often termed guided reading influences children's sense of identity feelings and progress as readers Drawing on a rich ethnographic study of three primary classrooms this book reopens a critical inquiry into ability grouped reading that has been quiet since the 1990s when guided reading in literacy education became established practice in the UK and the US Through the lens of children's agency in accommodating resisting and at times transforming such reading pedagogy the book shows how readers are shaped by ability grouped reading and by the more egalitarian reading pedagogies introduced in the study Children's individual and collective experiences are brought to life through extended narratives that attend as closely to gesture posture visage silences and prosody of speech as to spoken words The book ends with a provocation how literacy pedagogy might change if reflexive noticing and dismantling of hierarchies become the compass of pedagogical change This demands attention to structural inequalities around race gender and class and a turn towards deep listening to children As well as being a valuable

read for scholars of the sociology of childhood and education it should appeal to anyone concerned with making education more equitable including teachers school leaders parents carers and policymakers

### **Making Coaching**

**Matter** Sarah L. Woulfin, Isobel Stevenson, Kerry Lord, 2023 Districts and schools often count on coaching to promote student learning and organizational change Across the United States a wide variety of coaches engage in various types of work with teachers as well as school leaders But coaching is often loosely defined weakly supported and ultimately underutilized and as

a consequence its promise and potential have not been fully realized In this book the authors address misconceptions about the goals of coaching what it involves and how it aligns with reform efforts They advance a new coherent framing of coaching as a lever for strategic equitable school improvement Bridging research theory policy and practice this book provides insights to help educational reformers and district and school leaders strengthen the structures and activities of coaching This timely book illustrates how to make coaching matter by assembling infrastructure and creating conditions so that coaching advances change in robust sustaining and equitable ways Book Features Provides useful information for educational leaders whose expertise may not extend to coaching including tools and reflective questions Offers a strong theoretical and research based foundation along with the authors collective experience as researchers and practitioners and the voices of coaches and other educational leaders Advocates for a coaching model that supports a district s overall strategy for centering equity and improving student learning Describes how to build capacity and continuously improve coaching and how to support coaching through leadership logistics and resources
