Introduction To The Analytic Hierarchy Process Springerbriefs In Operations Research:

Introduction to the Analytic Hierarchy Process Matteo Brunelli, 2014-12-12 The Analytic Hierarchy Process AHP has been one of the foremost mathematical methods for decision making with multiple criteria and has been widely studied in the operations research literature as well as applied to solve countless real world problems This book is meant to introduce and strengthen the readers knowledge of the AHP no matter how familiar they may be with the topic This book provides a concise yet self contained introduction to the AHP that uses a novel and more pedagogical approach It begins with an introduction to the principles of the AHP covering the critical points of the method as well as some of its applications Next the book explores further aspects of the method including the derivation of the priority vector the estimation of inconsistency and the use of AHP for group decisions Each of these is introduced by relaxing initial assumptions Furthermore this booklet covers extensions of AHP which are typically neglected in elementary expositions of the methods Such extensions concern different numerical representations of preferences and the interval and fuzzy representations of preferences to account for uncertainty During the whole exposition an eye is kept on the most recent developments of the method Practical Decision

Making Enrique Mu, Milagros Pereyra-Rojas, 2016-08-16 This book offers a simple introduction to the fundamentals and applications of the Analytic Hierarchy Process AHP without a pre requisite for a sophisticated mathematical background It provides a quick and intuitive understanding of the methodology using spreadsheet examples and explains in a step by step fashion how to use Super Decisions a freely available software developed by the Creative Decisions Foundations The book is intended to be a resource for decision makers with little or no exposure to the field of Operations Research OR however the book can be used as a very gentle introduction to the AHP methodology and or as an AHP hands on supplement for standard OR textbooks AHP is an intuitive and mathematically simple methodology in the field of multi criteria decision making Because of this most AHP books assume the reader has basic OR mathematical background However AHP simplicity suggests that decision makers from all disciplines can take advantage of the methodology without struggling with the mathematics behind it To fulfill this need this book delivers a quick and practical understanding of the method that can be useful for corporate executives **Practical Decision Making using Super Decisions v3** Enrique Mu, Milagros

Analysis Jingzheng Ren, 2020-04-21 This book focuses on operations management methods for analysing complex systems from a system engineering perspective. It presents various advanced multi criteria decision analysis methods for investigating factors that influence complex systems. In turn, it shows how to improve systems performance including their competitiveness, safety and sustainability. The book also draws on examples of typical virtual systems such as tourism, aviation, maintenance and waste to wealth systems to illustrate the operations management methods discussed. Cases from day to day life are used to elicit heuristic questions on the operations management methods presented in each chapter. The book will help researchers, operations managers and engineers alike to understand the latest advances in operations management methods for analysing complex systems from the standpoint of system engineering.

Models, Methods, Concepts & Applications of the Analytic Hierarchy Process Thomas L. Saaty, Luis G. Vargas, 2012-04-12 This fully revised and updated second edition includes five new chapters addressing the nature of the eigenvector and its applications including selected uses of the analytic hierarchy process in economic, social, political and technological areas.

Models, Methods, Concepts & Applications of the Analytic Hierarchy Process Thomas L. Saaty, Luis Gonzalez Vargas, 2001 Models, Methods, Concepts and Applications of the Analytic Hierarchy Process is a volume dedicated to selected applications of the Analytic Hierarchy Process (AHP) focused on three themes: economics, the social sciences and the linking of measurement with human values.

- 1 The AHP offers economists a substantially different approach to dealing with economic problems through ratio scales. The main mathematical models on which economics has based its quantitative thinking to now are utility theory which uses interval scales and linear programming. We hope that the variety of examples included here can perhaps stimulate researchers in economics to try applying this new approach.
- 2 The second theme is concerned with social sciences. The AHP offers psychologists and political scientists the methodology to quantify and derive measurements for intangibles. We hope that the examples included in this book will encourage them to examine the methods of AHP in terms of the problems they seek to solve.
- 3 The third theme is concerned with providing people in the physical and engineering sciences with a quantitative method to link hard measurement to human values. In such a process, one needs to interpret what the measurements mean. A number is useless until someone understands what it means. It can have different meanings in different problems. Ten dollars are plenty to satisfy one's hunger but are useless by themselves in buying a new car. Such measurements are only indicators of the state of a system but do not relate to the values of the human observers of that system. AHP methods can help resolve conflicts between hard measurement data and human values.
