A Conception of Teaching Nathaniel L.

Gage,2009-04-05 The literature of the behavioural and social sciences is full of theory and research on learning and memory Teaching is comparatively a stepchild neglected by those who have built a formidable body of theories of learning and memory However teaching is where learning and memory theory should pay off A Conception of Teaching dedicates a chapter to each of the following important components the need for a theory the possibility of a theory the evolution of a paradigm for the study of teaching a conception of the process of teaching a conception of the content of teaching a conception of students cognitive capabilities and motivations a conception of classroom management and the integration of these conceptions Written in a highly accessible style while maintaining a base in research Dr Nathaniel L Gage presents A Conception of Teaching with clarity and well situated within current educational debates

The Indispensability of

Phenomenology, Experiment and History René Van Hezewijk,Henderikus J. Stam,2024-11-08 This book is the first

comprehensive intellectual biography of Johannes Linschoten whose work has been credited with helping to bring down the Utrecht School of phenomenological psychology. The authors show this to be a mistaken assumption in the light of Linschoten's entire oeuvre and demonstrate his importance for an understanding of a phenomenological psychology that necessarily coexists with an experimental scientific psychology. In the Netherlands Linschoten is particularly appreciated for his last book published posthumously. That volume *Idols of the Psychologist* took a critical look at phenomenological psychology and its pretensions while simultaneously acknowledging that a phenomenological outlook is a necessity for beginning any kind of experimental investigation. Most commentators on this book considered Linschoten a convert from phenomenology to experimental psychology but have either ignored his earlier substantive work or have not seen the importance of the intellectual context for his final work. By examining his life and the full extent of his voluminous writings this book demonstrates Linschoten's importance for the development of psychology in the Netherlands and beyond. It will shed new light on the life and work of Johannes Linschoten as well as the Dutch school of phenomenology and its postwar contributions to psychology in Europe and North America. Furthermore for the first time this book brings together important aspects of Linschoten's life with his prodigious output. It demonstrates how his life and work created a unique psychology that deserves to be continued and developed.
