Theory and Applications of Satisfiability Testing - SAT 2009 Oliver Kullmann,2009-06-29 This volume contains the papers presented at SAT 2009 12th International Conference on Theory and Applications of Satisfiability Testing held from June 30 to July 3 2009 in Swansea UK The International Conference on Theory and Applications of Satisfiability Testing SAT started in 1996 as a series of workshops and in parallel with the growth of SAT developed into the main event for SAT research This year conference testified to the strong interest in SAT regarding theoretical research search algorithms investigations into applications and development of solvers and software systems As a core problem of computer science SAT is central for many research areas and has deep interactions with many mathematical subjects Major impulses for the development of SAT came from concrete practical applications as well as from

fundamental theoretical research This fruitful collaboration can be seen in virtually all papers of this volume There were 86 submissions completed papers within the scope of the conference Each submission was reviewed by at least three and on average 4.0 Programme Committee members The Committee decided to accept 45 papers consisting of 34 regular and 11 short papers restricted to 6 pages A main novelty was a shepherding process where 29% of the papers were accepted only conditionally and requirements on necessary improvements were formulated by the Programme Committee and its installment monitored by the shepherd for that paper using possibly several rounds of feedback *Office of Education Research Reports, 1956-1965* United States.
