Snort is the world's most widely deployed open source intrusion detection system with more than 500,000 downloads. A package that can perform protocol analysis, handle content searching and matching, and detect a variety of attacks and probes. Drawing on years of security experience and multiple Snort implementations, the authors guide readers through installation, configuration, and management of Snort in a busy operations environment. No experience with intrusion detection systems (IDS) required. Shows network administrators how to plan an IDS implementation, identify how Snort fits into a security management environment, deploy Snort on Linux and Windows systems, understand and create Snort detection rules, generate reports with ACID and other tools, and discover the nature and source of attacks in real time. CD-ROM includes Snort ACID and a variety of management tools.
