Hans H. Rudnick

Intuition Et E Sens:

La Revue française de Prague, 1929, **Vocabulaire technique et critique de la philosophie** André Lalande, 1928 **Vocabulaire technique et critique de la philosophie** Société française de philosophie, 1926 Bulletin de la Société française de philosophie Société française de philosophie, 1905 Bibliographie de la philosophie française 1909-12 included in bulletins for 1910-13 *Ingardeniana II* Hans H. Rudnick, 2012-12-06 This Ingardenia volume is the second in the *Analecta Husserliana* series that is entirely devoted to the phenomenology of Roman Ingarden. The first was volume IV 1976. Twenty years after Ingarden's death, this volume demonstrates that the Polish phenomenologist's contribution to philosophy and literary scholarship has received world-wide attention. His ideas have proven especially fruitful for the definition of the structure of the literary work of art and the subsequent recognition of its characteristic features. Of all the early phenomenologists who were students of Husserl, it is Ingarden whose work has faithfully pursued the original tenet that language holds the essence of the life-world in readiness (*bereit halten*). To investigate this premise with the rigor of a science as Husserl had envisioned for phenomenology was Ingarden's life-work. That Ingarden did not quite reach his ambitious goal does not diminish his unquestionable achievement. The understanding of the nature of the literary work of art has increased enormously because of his analyses and aesthetics. The Polish phenomenologist investigated above all the work of art as a structure of necessary components which define and determine its nature. That the artistic ingredient was shortchanged under those conditions should not be surprising particularly since Ingarden usually kept a purist's philosophical distance from the concrete detail of the material under consideration. He was not concerned with individual works of art but with the principle that was shared by all of them as the defining feature of their being. **Catalogue of the Library of the Peabody Institute of the City of Baltimore ...** George Peabody Library, 1892 Metaphysique de l'esprit Pierre Magnard, 1996 **Studia Phaenomenologica VI / 2006** Cristian Ciocan, 2006-01-01 *Weyl and the Problem of Space* Julien Bernard, Carlos Lobo, 2019-10-09 This book investigates Hermann Weyl's work on the problem of space from the early 1920s onwards. It presents new material and opens the philosophical problem of space anew, crossing the disciplines of mathematics, history of science and philosophy. With a Kantian starting point, Weyl asks among all the infinitely many conceivable metrical spaces which one applies to the physical world. In agreement with general relativity, Weyl acknowledges that the metric can quantitatively vary with the physical situation. Despite this freedom, Weyl deduces with group-theoretical technicalities that there is only one kind of legitimate metric. This construction was then decisive for the development of gauge theories. Nevertheless, the question of the foundations of the metric of physical theories is only a piece of a wider epistemological problem. Contributing authors mark out the double trajectory that goes through Weyl's texts from natural science to philosophy and conversely always through the mediation of mathematics. Readers may trace the philosophical tradition to which Weyl refers and by which he is inspired: Kant, Husserl, Fichte, Leibniz, Becker etc. and explore the mathematical tradition.

Riemann Helmholtz Lie Klein that permitted Weyl to elaborate and solve his mathematical problem of space Furthermore this volume analyzes the role of the interlocutors with whom Weyl discussed the nature of physical space Einstein Cartan De Sitter Schrödinger Eddington This volume features the work of top specialists and will appeal to postgraduates and scholars in philosophy the history of science mathematics or physics **Larousse French English Dictionary Canadian Edition** Larousse,1997-06-01 **L'immédiat chez H.
