It consolidates a wealth of testimonies, forensic evidence and analyses aiming to address public skepticism and conspiracy theories by affirmatively asserting that Lee Harvey Oswald acted alone in the assassination of President John F. Kennedy. The author, a collective body of experts and officials appointed by President Lyndon B. Johnson, sought to provide an exhaustive investigation into a pivotal moment in American history. The Commission was propelled by the urgent need to restore public confidence in the political system after a traumatic national tragedy. This unique interplay of political necessity and investigative rigor imbues the report with an authoritative weight as it encapsulates the socio-political climate of the 1960s. This essential document is highly recommended for scholars, students and anyone intrigued by American history, particularly those seeking to understand the complexities and implications of the Kennedy assassination. Investigation of the Assassination of President John F. Kennedy United States. Warren Commission, 1964. Warren Commission hearings. **Archaeological Investigation** Martin Carver, Madeleine Hummler, 2024-12-18. The thoroughly updated second edition of *Archaeological Investigation* reviews and explains the practices of field archaeology in the world today. Now co-authored by Madeleine Hummler, the book's scope has been enlarged in time and space, reaching out to the different methods and strategies applied in both the academic and commercial sectors in diverse terrain, on land and under the sea. *Archaeological Investigation* accompanies the reader on a journey from absolute beginner to professional. Part 1: Principles sets the scene for newcomers, showing the axial role of fieldwork in rediscovering the past. Part 2: In the Field is aimed at those setting out to collect primary data by the diverse methods of modern survey and excavation. Word pictures on 'First day in the field' and 'First day on a dig' provide friendly introductions to the high-tech enterprise that fieldwork has become. Now fully engaged in the process, newcomers to archaeology are ready in Part 3: Writing Up to take part in the process of making the discoveries known. Here the findings of fieldwork are marshalled to analyse the assemblage, the use of space and the chronology of what happened. The results are then combined in a synthesis and communicated through websites, museums, the display of sites and, above all, through publication. Part 4: Design engages the reader in archaeology's primary action: how to design projects that conserve, rediscover and explain the human past, beginning with a review of some landmark examples. Chapter 13: The final chapter, The Profession, reviews the role of the state, the academy, the commercial sector and the public in making archaeology happen and why it matters. Building on the authors' extensive experience, *Archaeological Investigation* remains an inspiring, provocative, informative and entertaining book for students and professionals, arguing that the investigation of the human and environmental past is highly relevant to contemporary society and its future.
